

OUR STATUS

As a young company, VaLea CT is already a partner of several international sponsors of clinical trials and provides home trial support in Austria, Germany and Switzerland.

The mission of VaLea CT :

- increase the use of home trial support for clinical trials
- bring the advantages of this work to the attention of the nursing staff
- provide specific trainings and education

VaLea ct takes over many activities that are necessary for the success of the clinical trial:

From the initiation of study projects, consulting, logistics, staff training, coordination of all processes and activities under the study protocol, to the acquisition of patients and quality assurance.

HOW VALEA CT HELPS

Home Trial Support

Through Home Trial Support, we take clinical trials to the patient's home and partially conduct them there. This means that the patients are spared the sometimes long and arduous journeys to the clinic; as a result, they have a higher motivation to participate in the trial until the end, thus leading to a dramatic decline of drop-out rates.

Visits with no need of MD or robust medical devices can and may be at the patient home or at alternative site than the clinic, relocated.
