Product Development Services

Our cutting-edge facilities house a fully integrated PDS (Product Development Services) unit, which covers all product life cycle phases from early development to commercial in the same plant, using equipment replication from lab scale, through small scale GMP batches, until full scale commercial GMP.

The development group provides clients with access to:

Formulation
development

Process
development

CTM
manufacturing

Scale-up
services

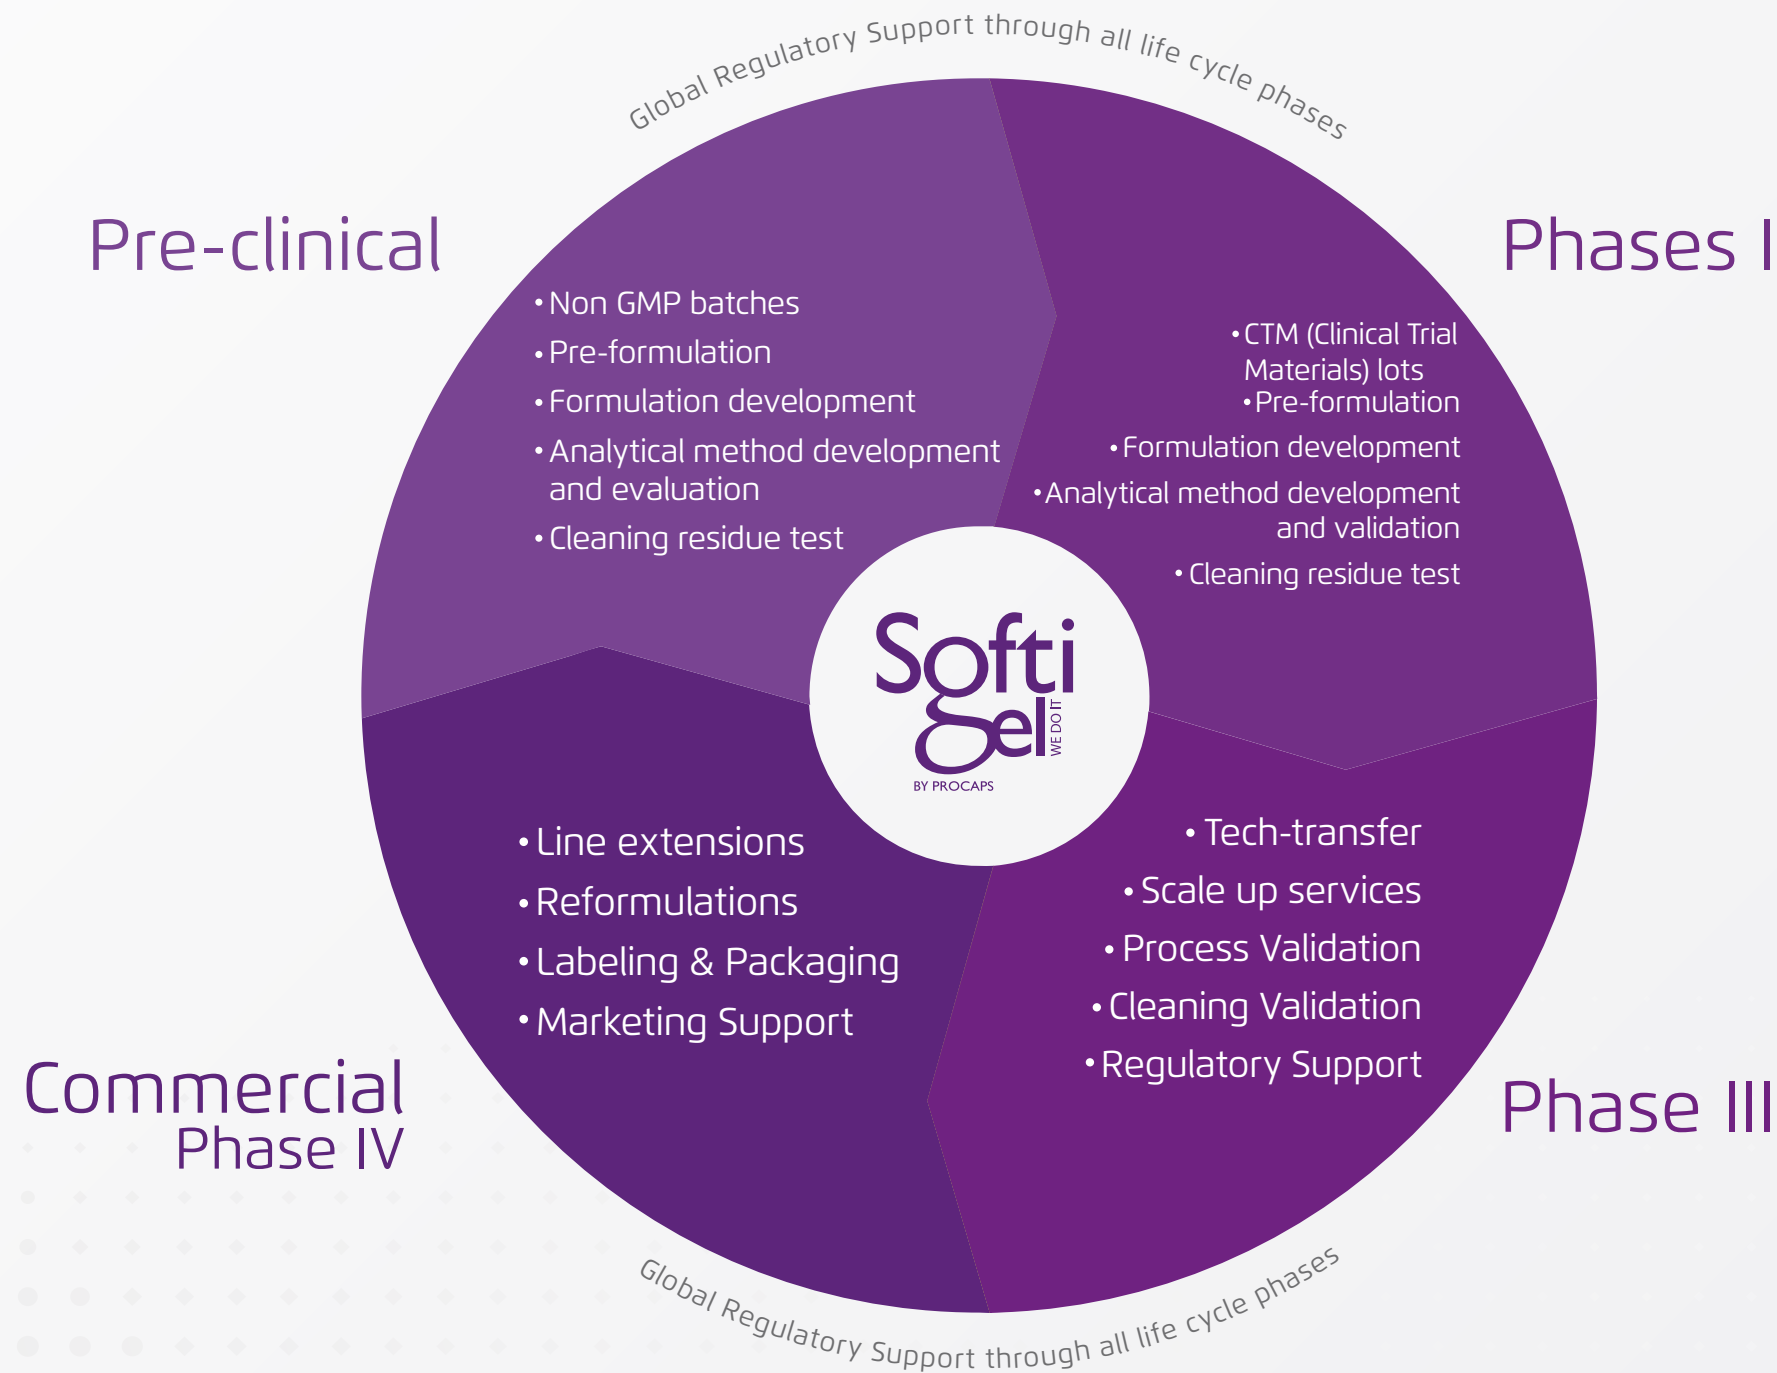

Minimizing variability
in scaled-up batches

Flexibility for
GMP batches

For a range of softgel types and other drug delivery forms, from phase I scale, scale-up and registration, through to large scale commercial production.

Product Development Services

We cover a wide range of **services** along the **full lifecycle** of a **softgel** and other drug delivery forms, from **early development** to **large scale commercial supply**.

Revolutionary Technologies
for enjoyable consumer experience.
