We bring to life what your team discovers.

3DforScience is a Scientific video production & 3D medical animation company for Bio&Health sector,helping pharmaceutical, biotechnology, medical device and healthcare companies for marketing campaigns.

Services

ANIMATION

ILLUSTRATION

INTERACTION

VR

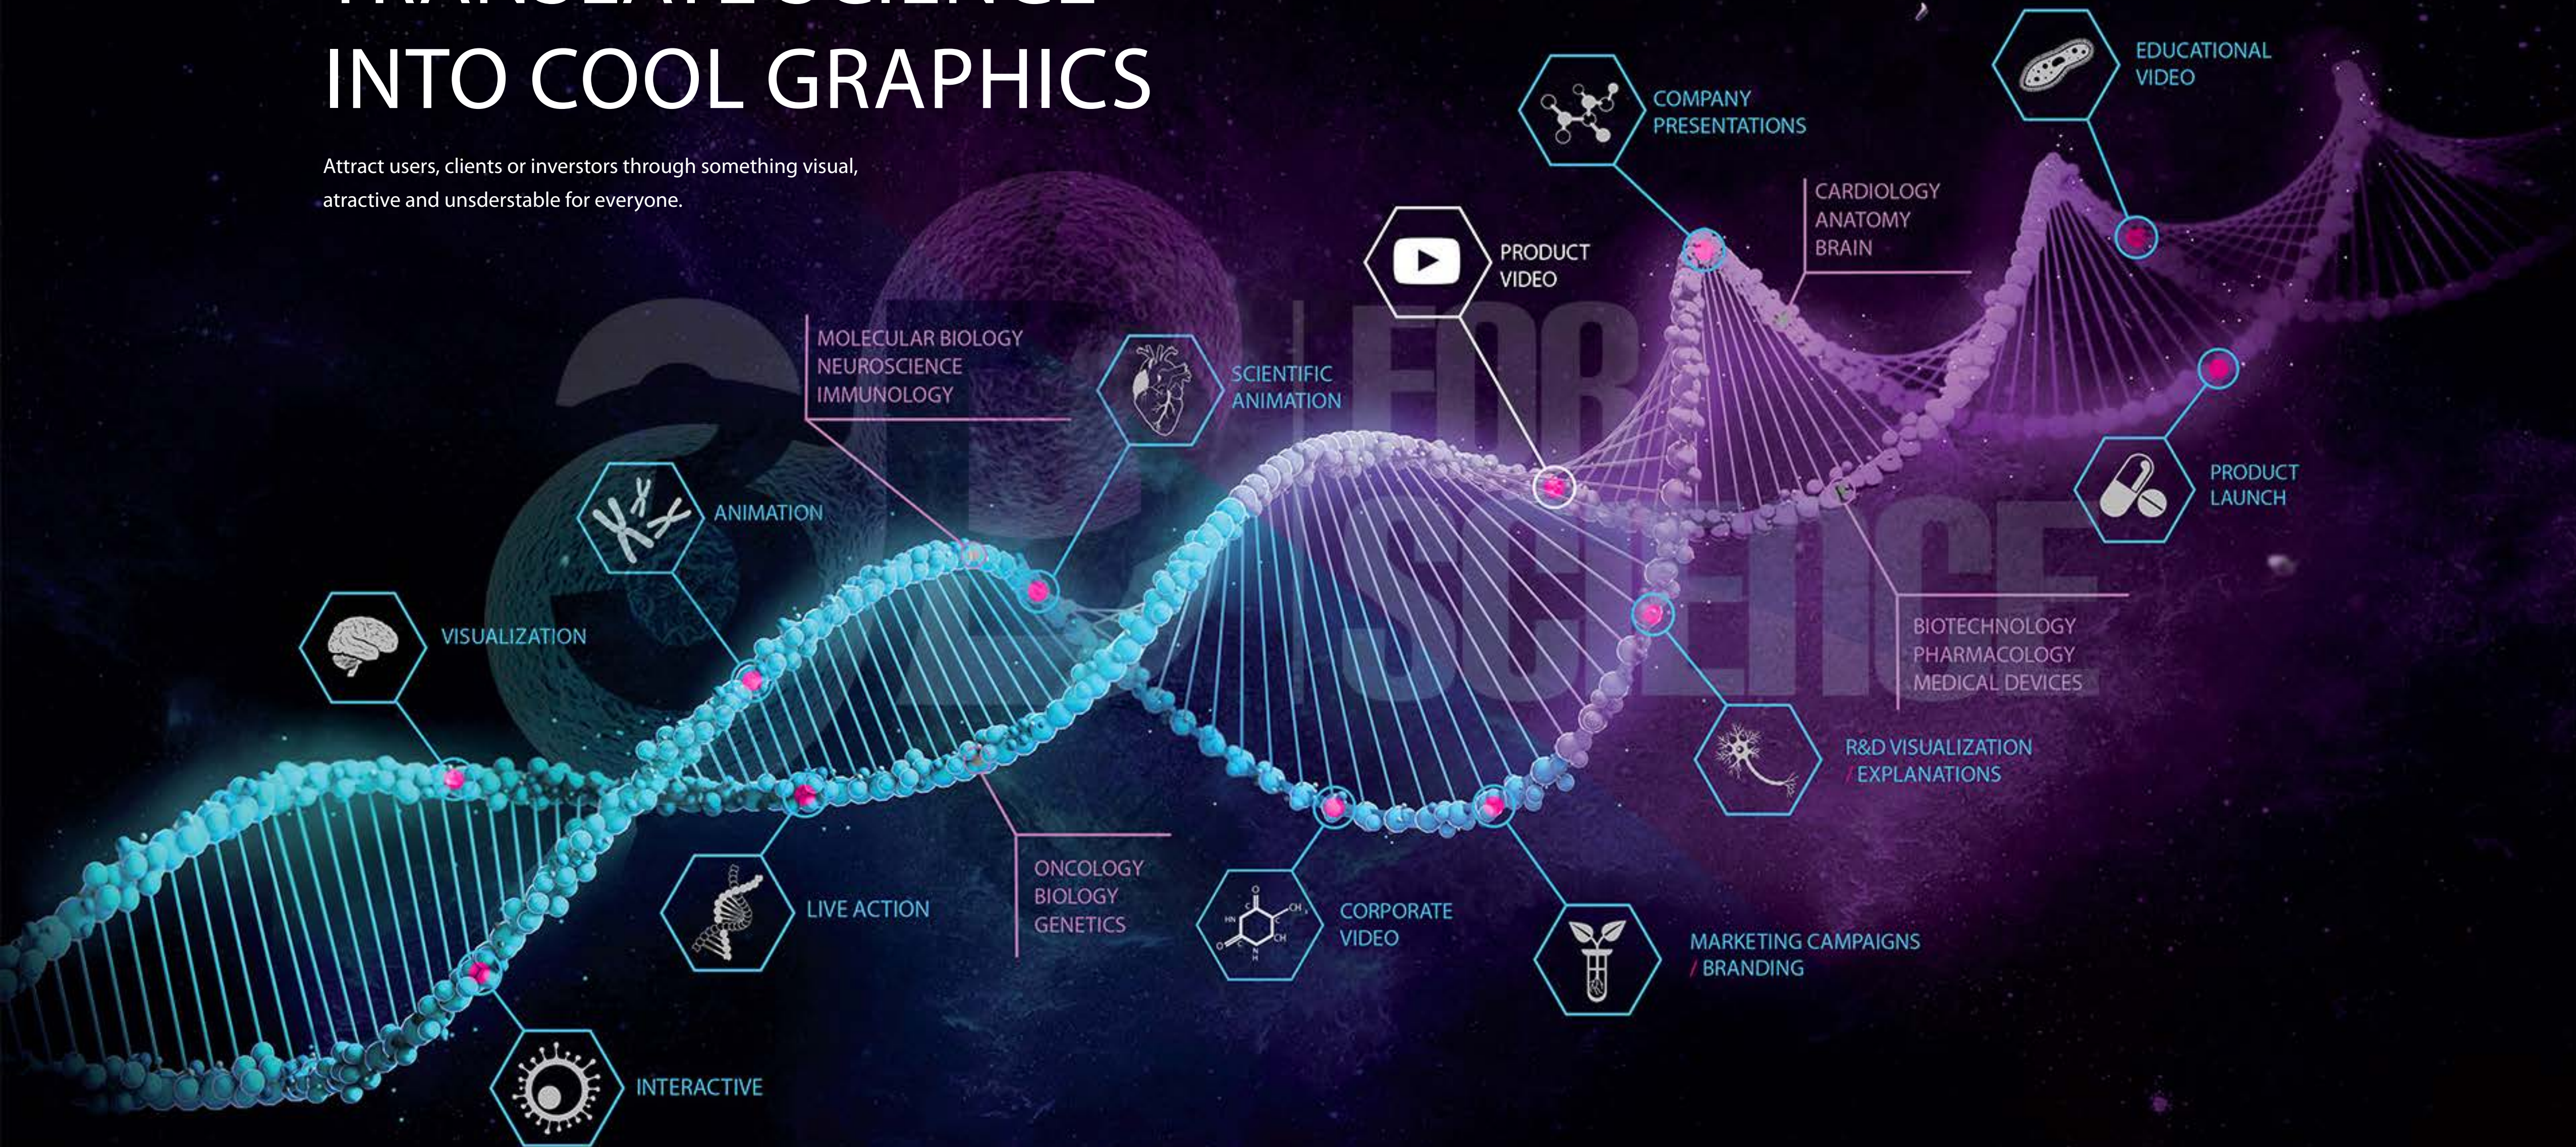

WITH 3DFORSCIENCE YOU GET:

- World class producers and animators at the forefront of their industry.
- Creative design from specialised artists.
- Smooth, on-time and seamless Agency-Production company workflow.
- Professional project management platform for scripting, deadlines, etc..
- White label collaboration.
- Complete confidentiality of the project.
- Script with commercial focus and scientific approach.

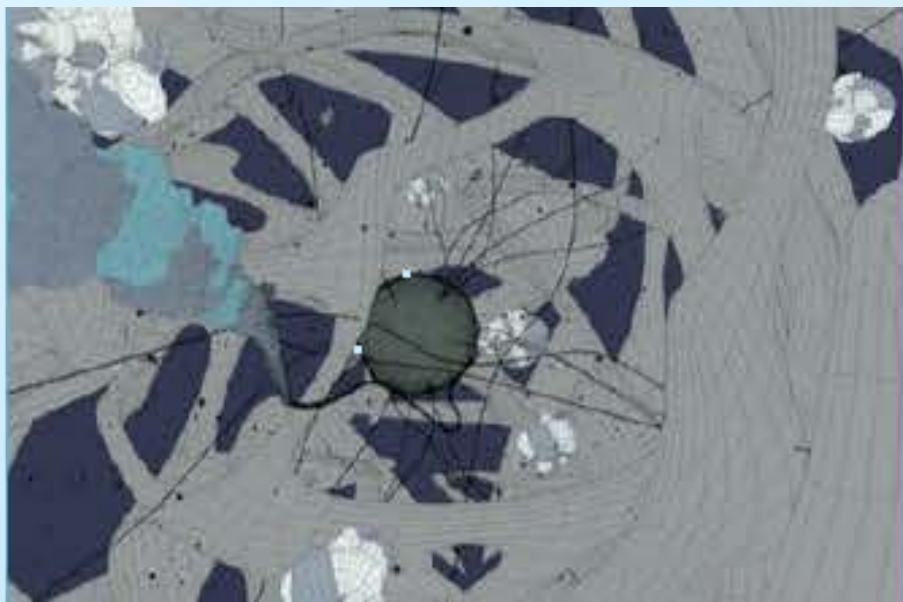

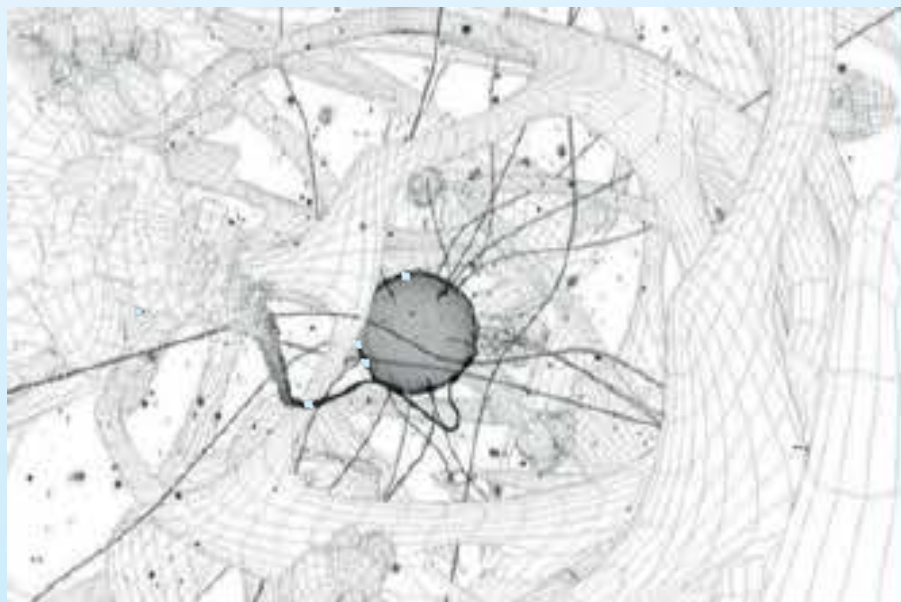

TRANSLATE SCIENCE INTO COOL GRAPHICS

Attract users, clients or investors through something visual,
attractive and understandable for everyone.

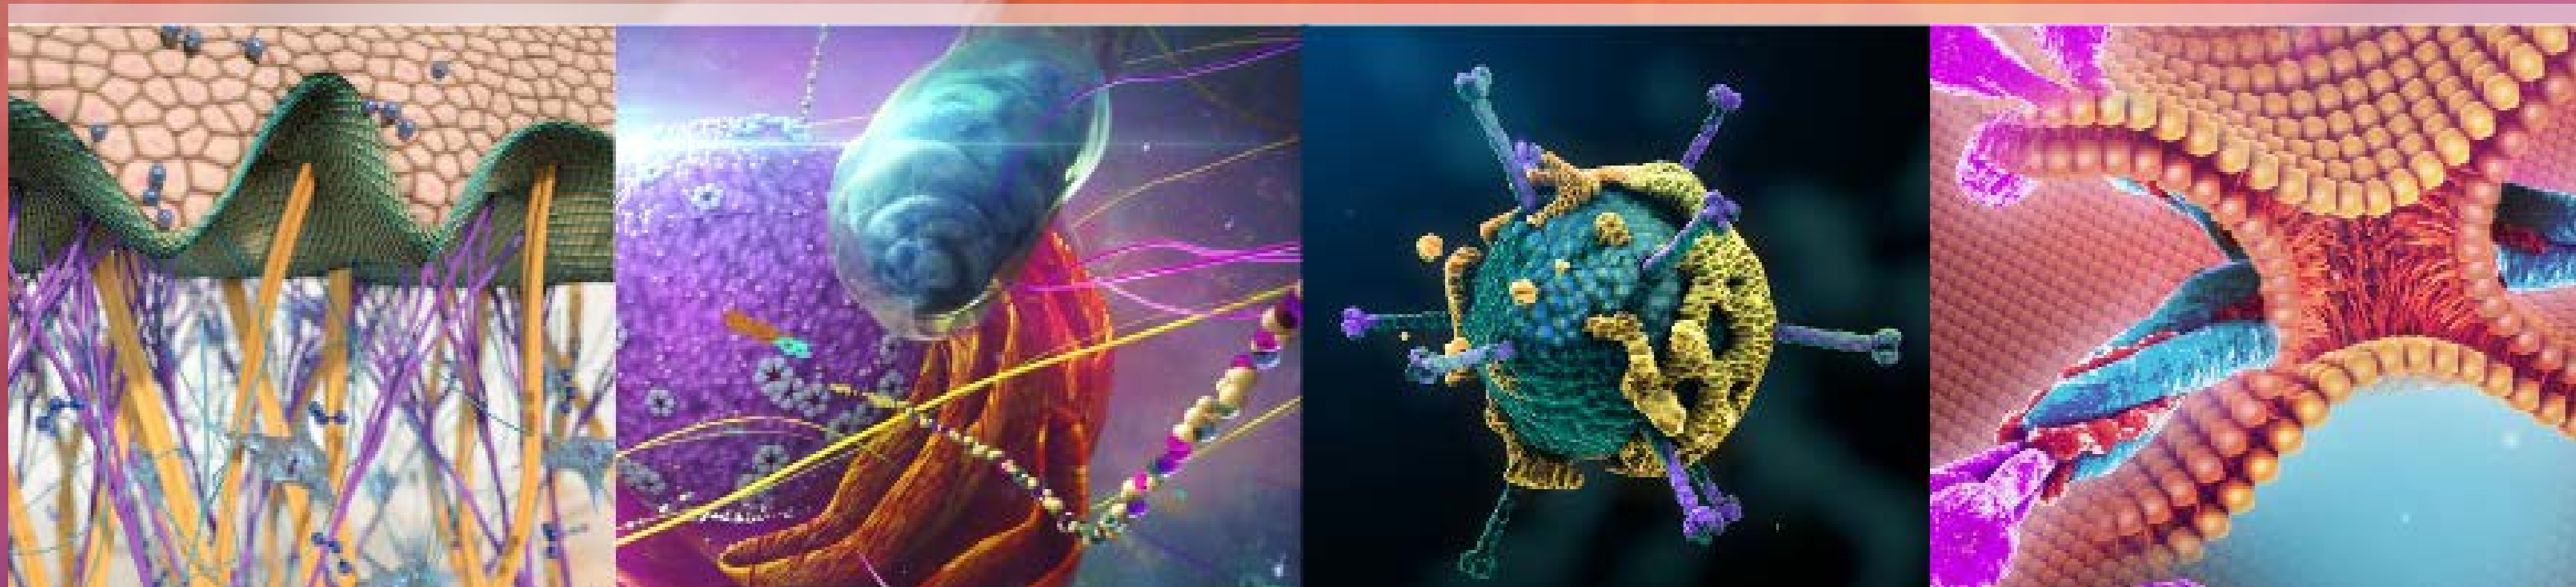

ANIMATION AN EXCELLENT USE OF SCIENTIFIC ANIMATION IS TO VISUALLY SHOW COMPLEX SCIENTIFIC CONCEPTS, SUCH AS A PHARMACEUTICAL MOA (MECHANISM OF ACTION) OR THE SPECIFIC DETAILS OF BIOTECH TECHNOLOGIES.

- Ideal to showcase new products at launch
 - Explain complex processes in an engaging way
 - Enhance current training applications
 - Valuable for patient education and engagement
- Stand out at events and increase brand awareness
 - Demonstrate proof of concept to investors
 - Promote interest through media engagement
 - Allows effective communication of key concepts
- Ideal to showcase new products at launch
 - Explain complex processes in an engaging way
 - Enhance current training applications
 - Valuable for patient education and engagement

ILLUSTRATION

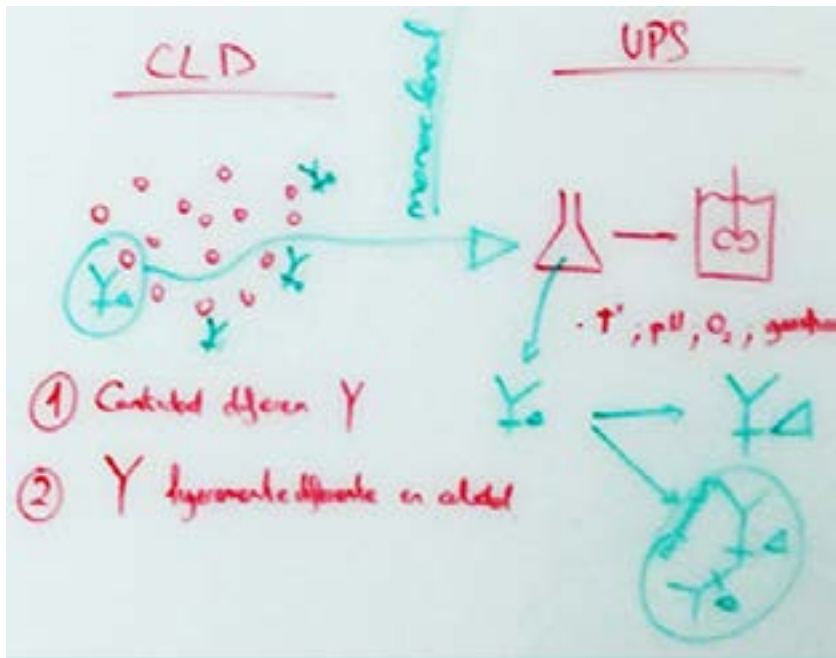

Highly detailed, expertly crafted illustrations make it easy to inform, explain and share with vital decision makers who are evaluating your product or device, for a variety of communication media - industry magazine covers, product marketing materials, and specific branding requirements.

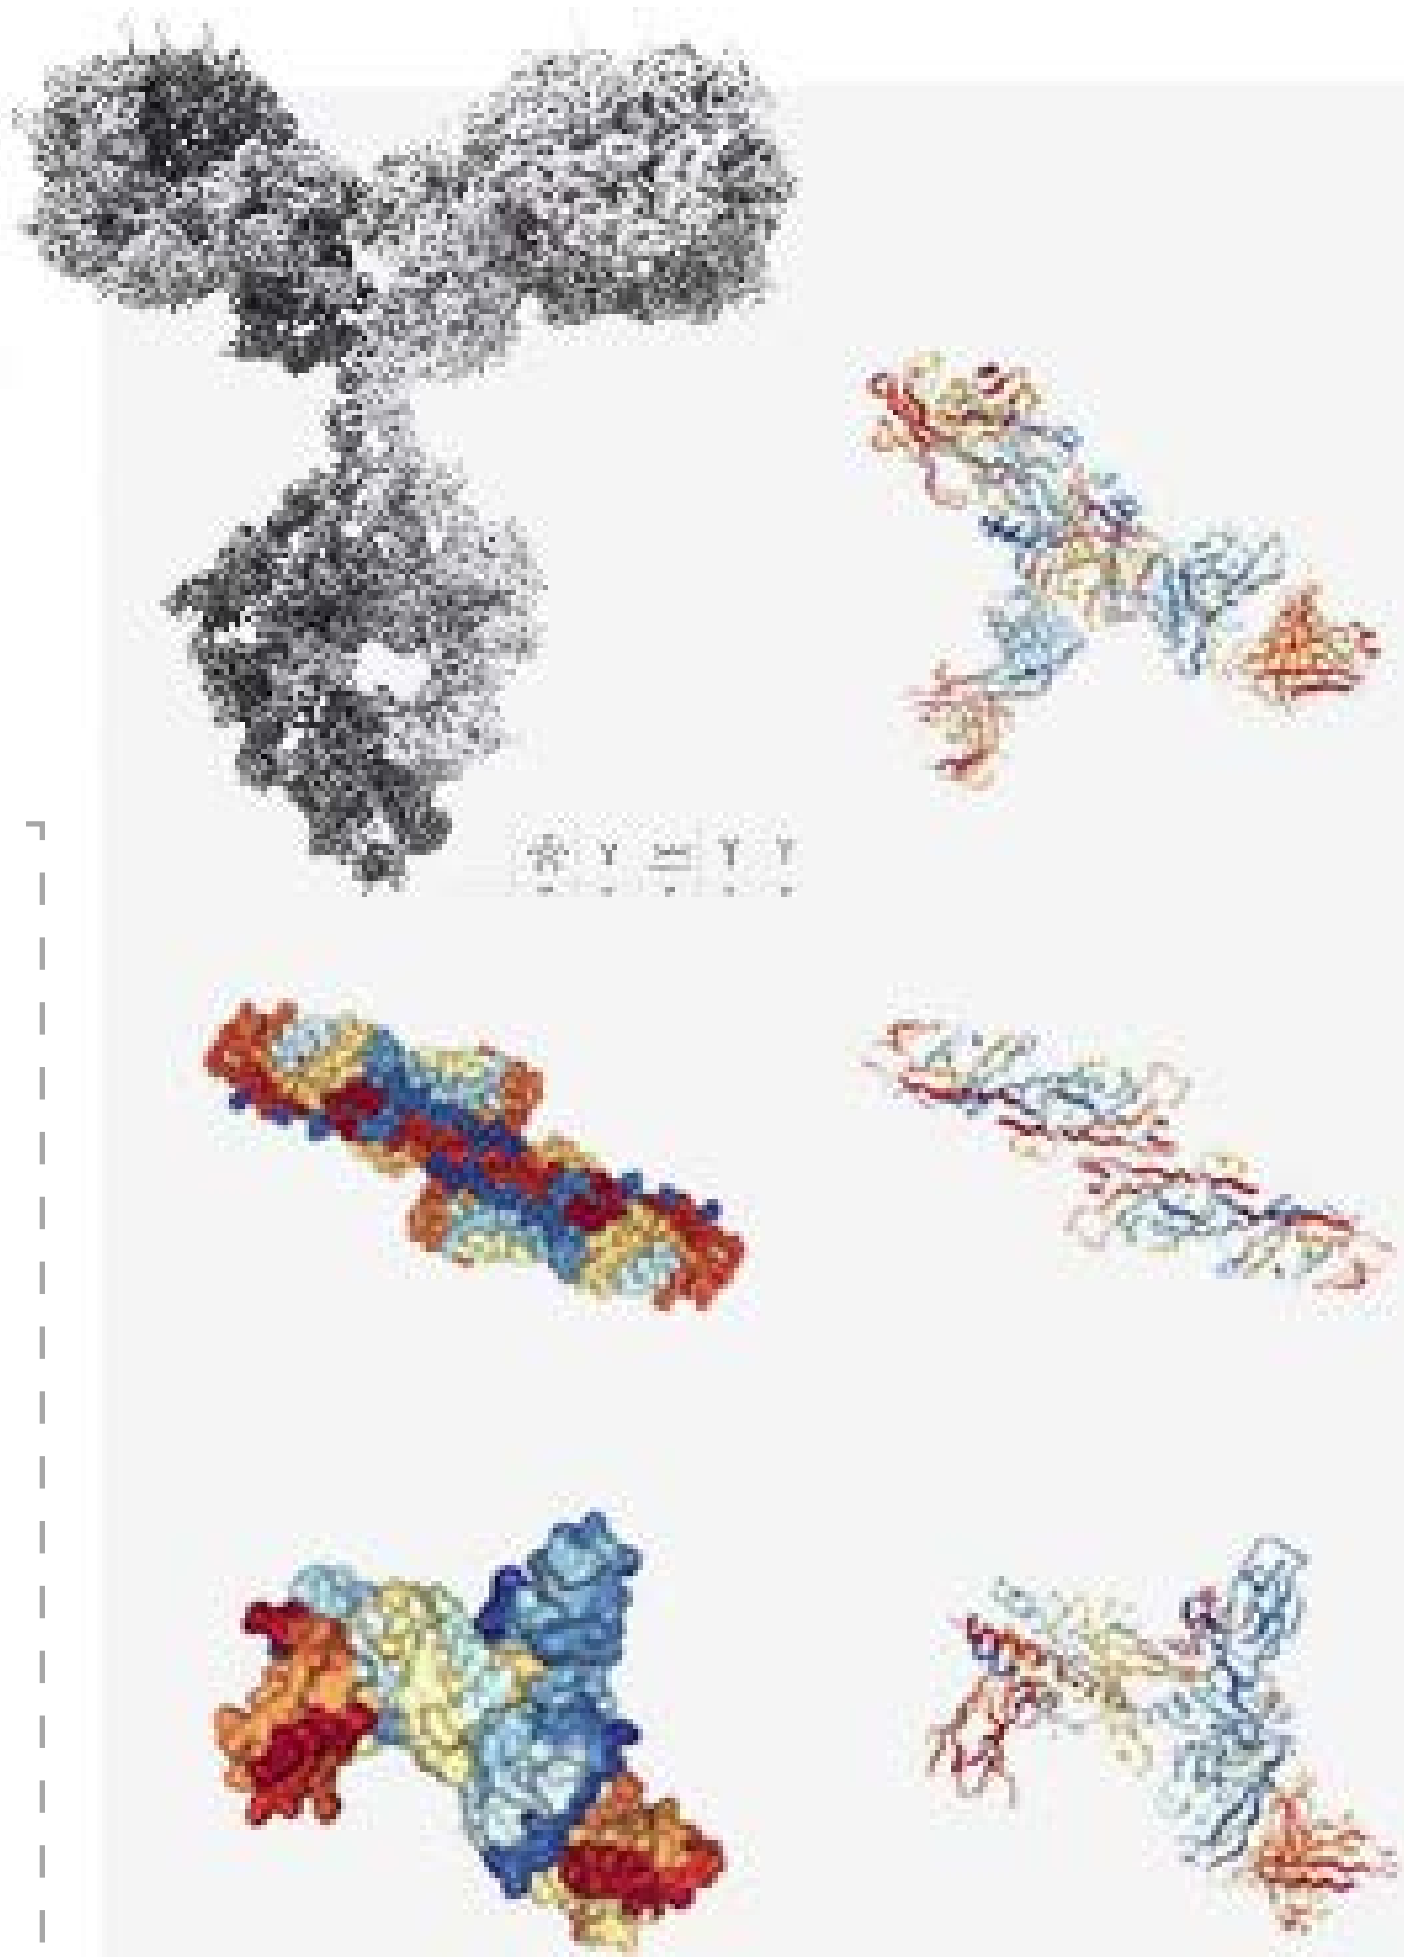

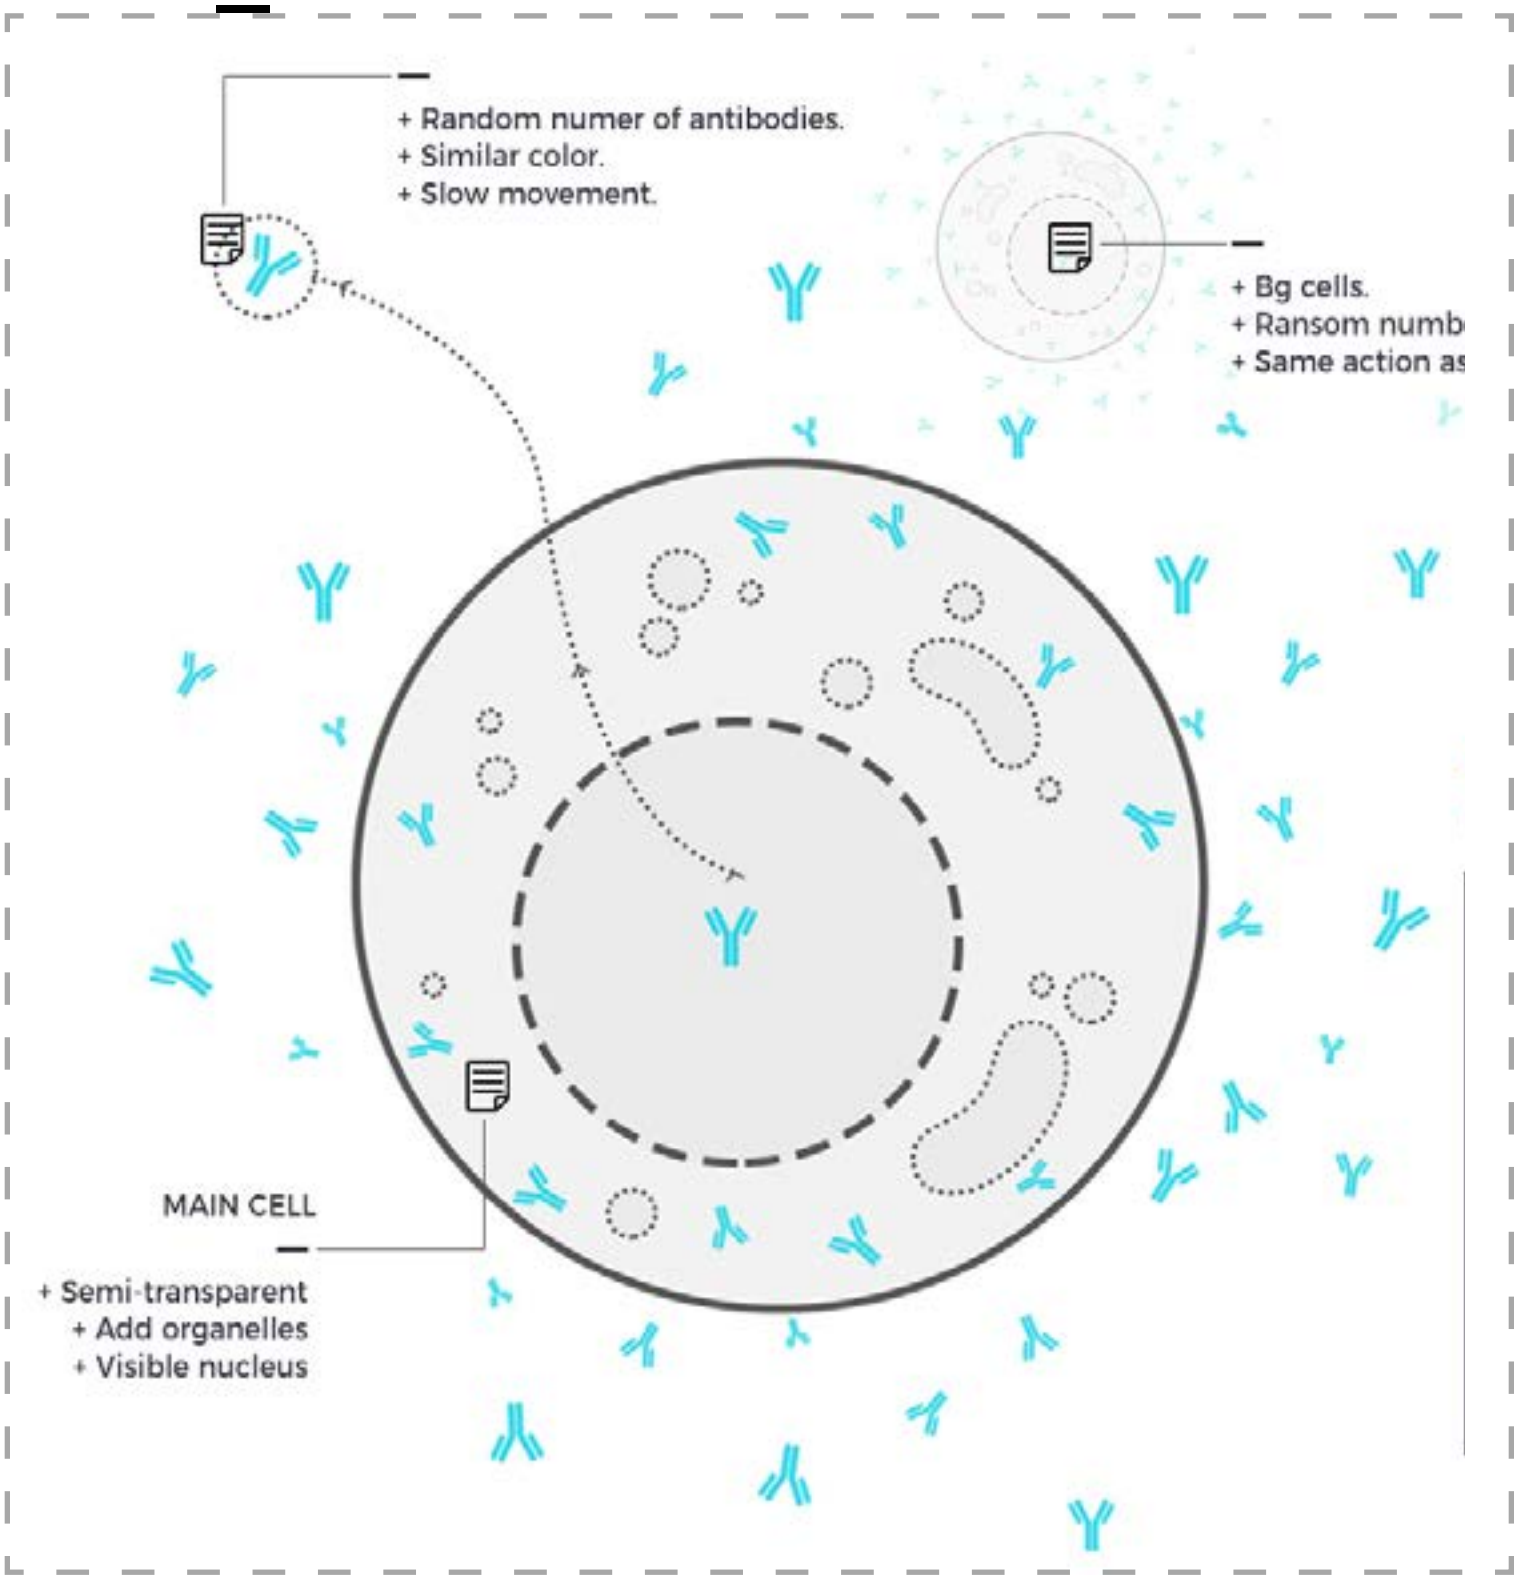

CONCEPTUALIZATION

Starting from schematic notes and sketches of the client, we began to translate this complex process into a narration with visual coherence; targeted to professionals and to a general public.

CLIENT’S REFERENCE

CONCEPT

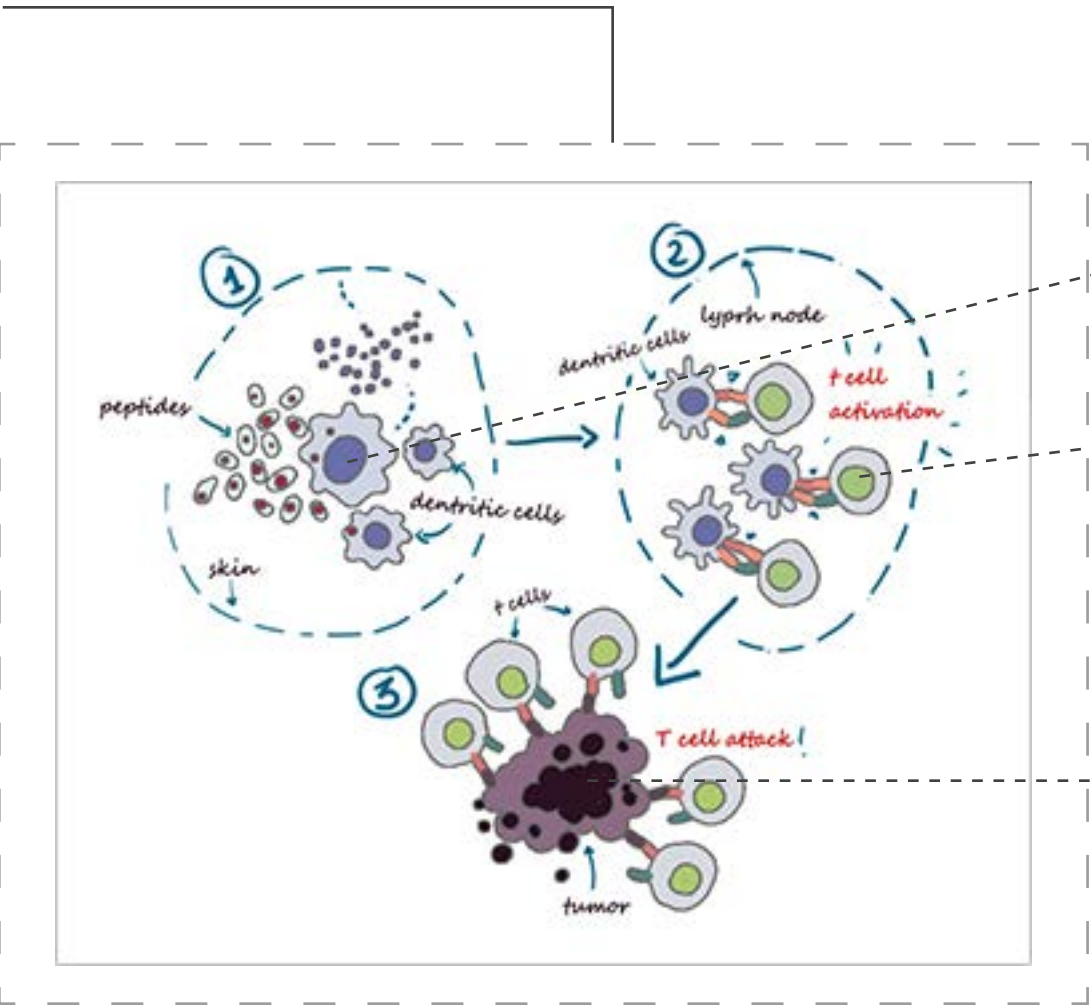

During this phase we keep a fluent communication with the client because, in 3Dforscience, we believe that the basis of a great animation lays on a good conceptualization.

IMPROVE YOUR MOA PRESENTATIONS

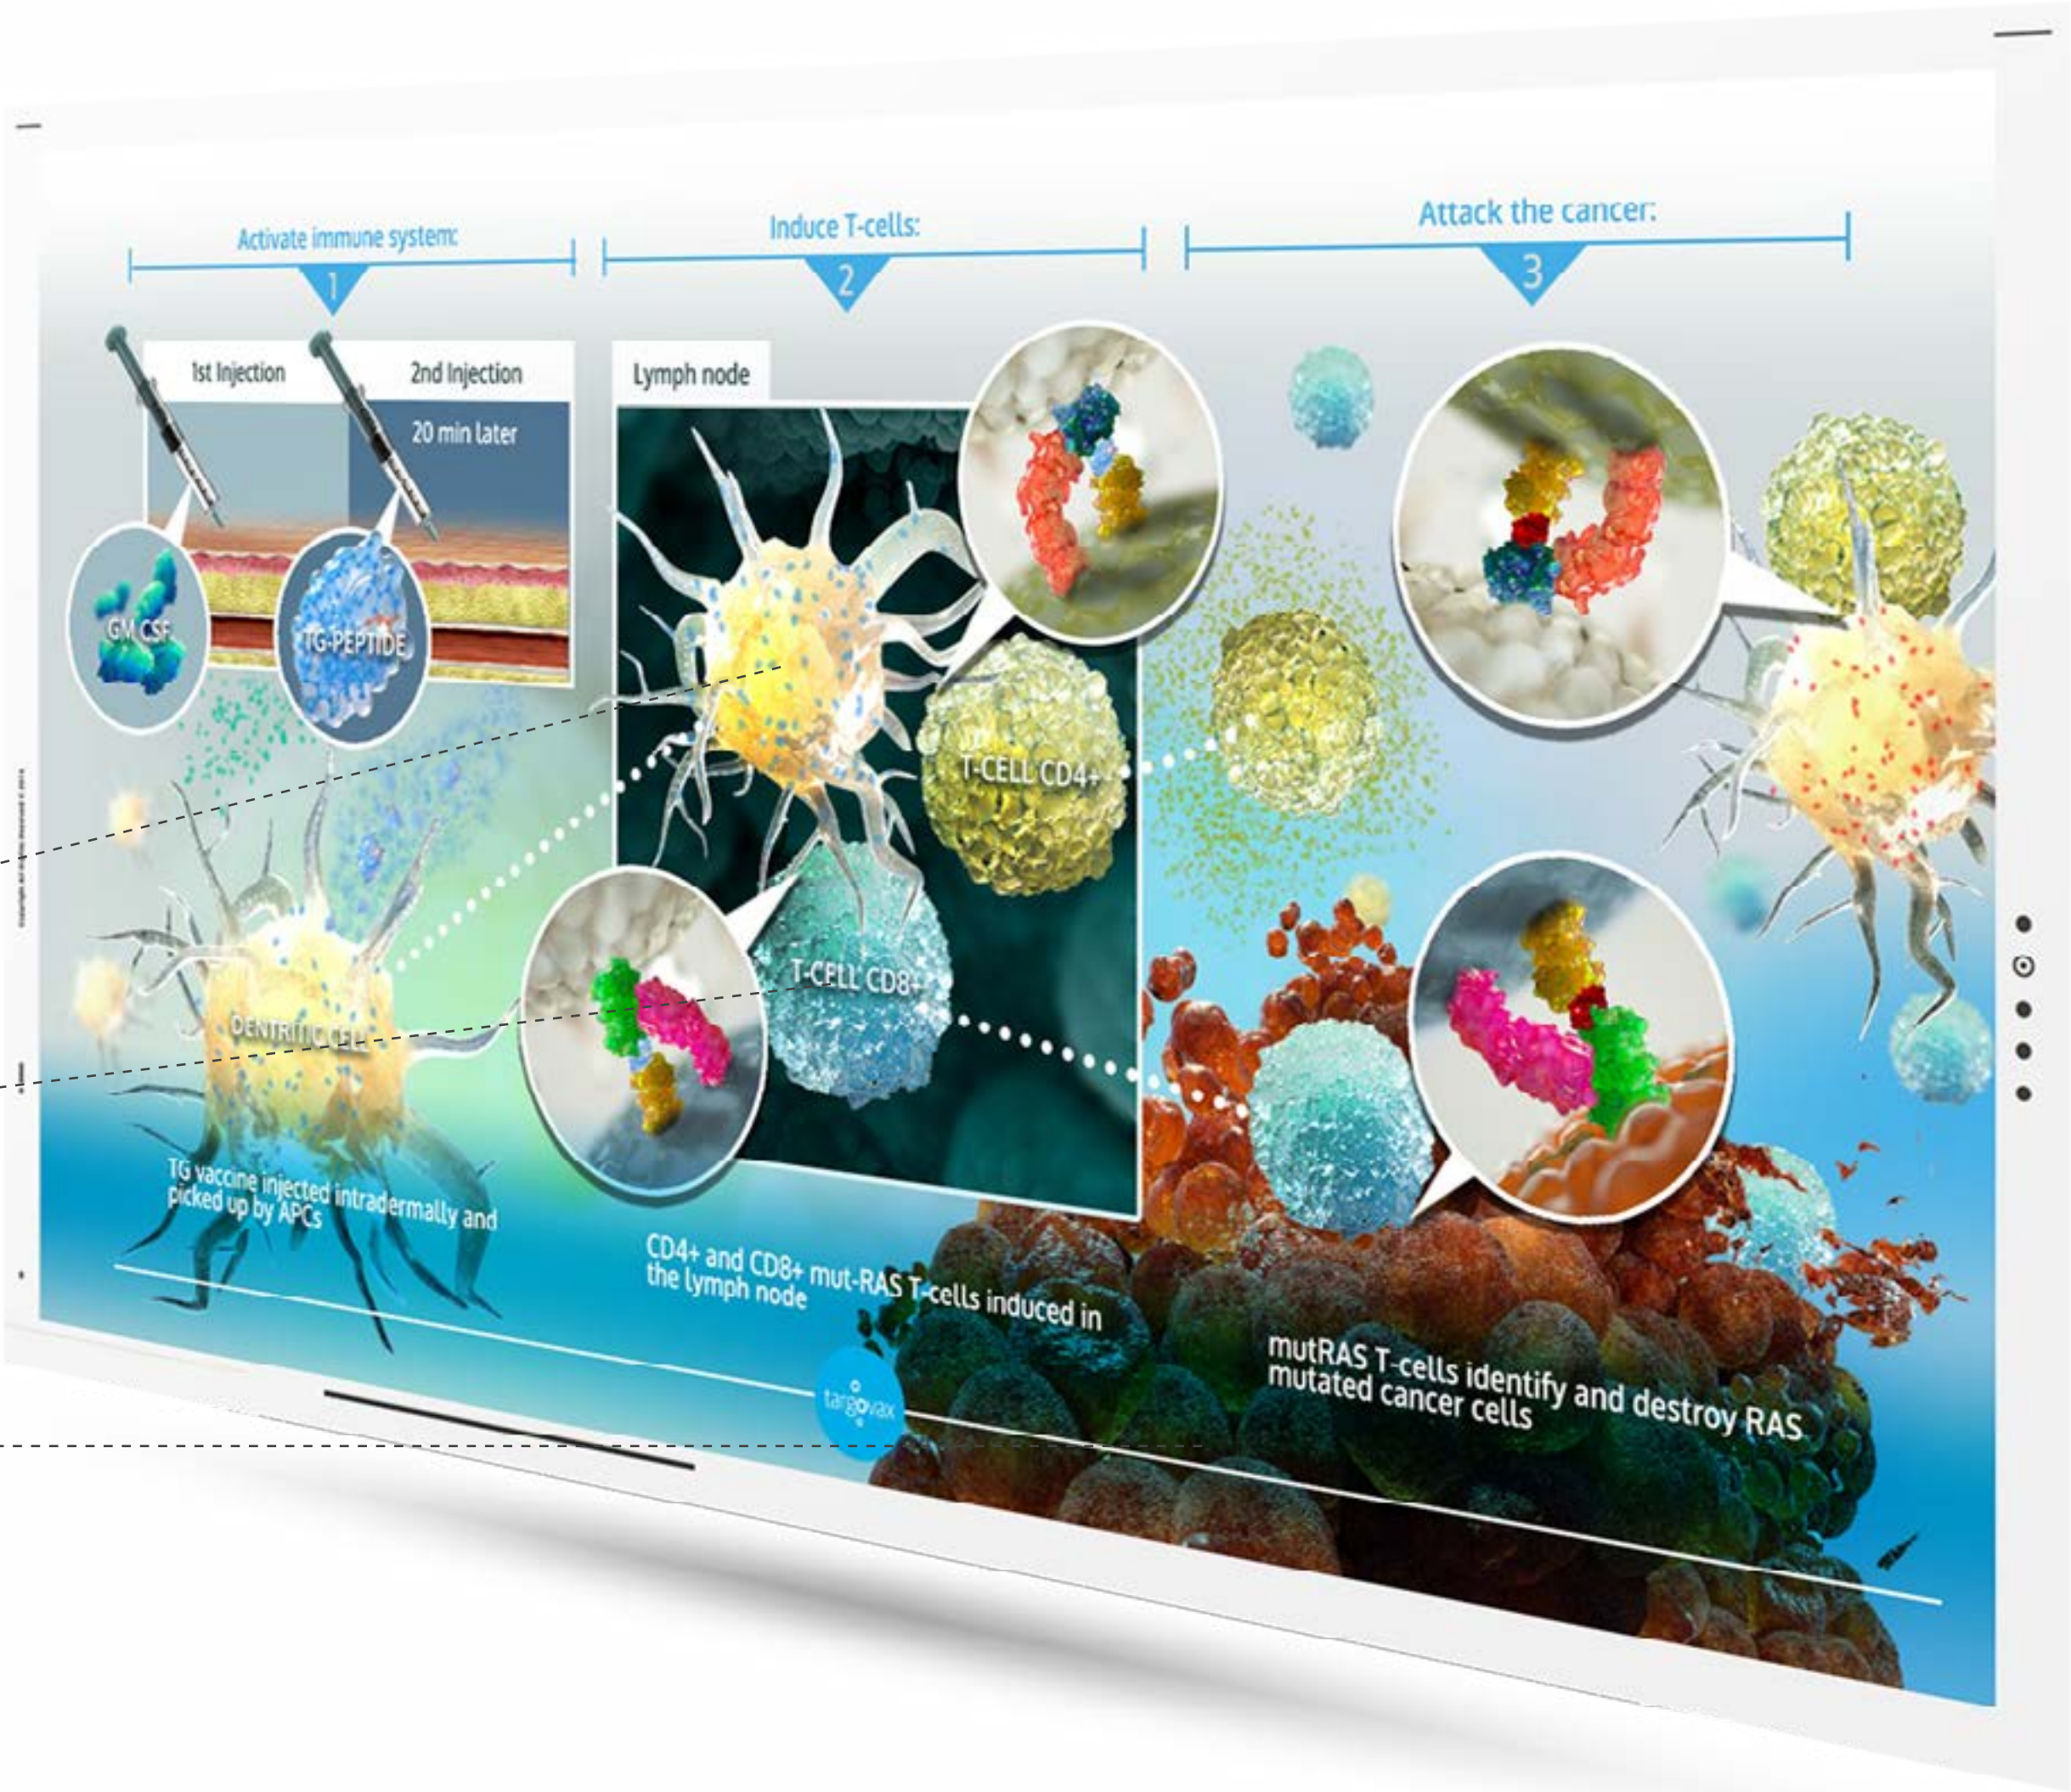

We take our customer presentation as a reference, we are able to create incredible visuals. We make a complex technology more appealing and understandable.

Every element will be made from scratch. It means that we can provide our clients with all separated elements with transparent background, so they can modify the compositions easily or built new presentations by their own.

CLIENT'S PRESENTATION

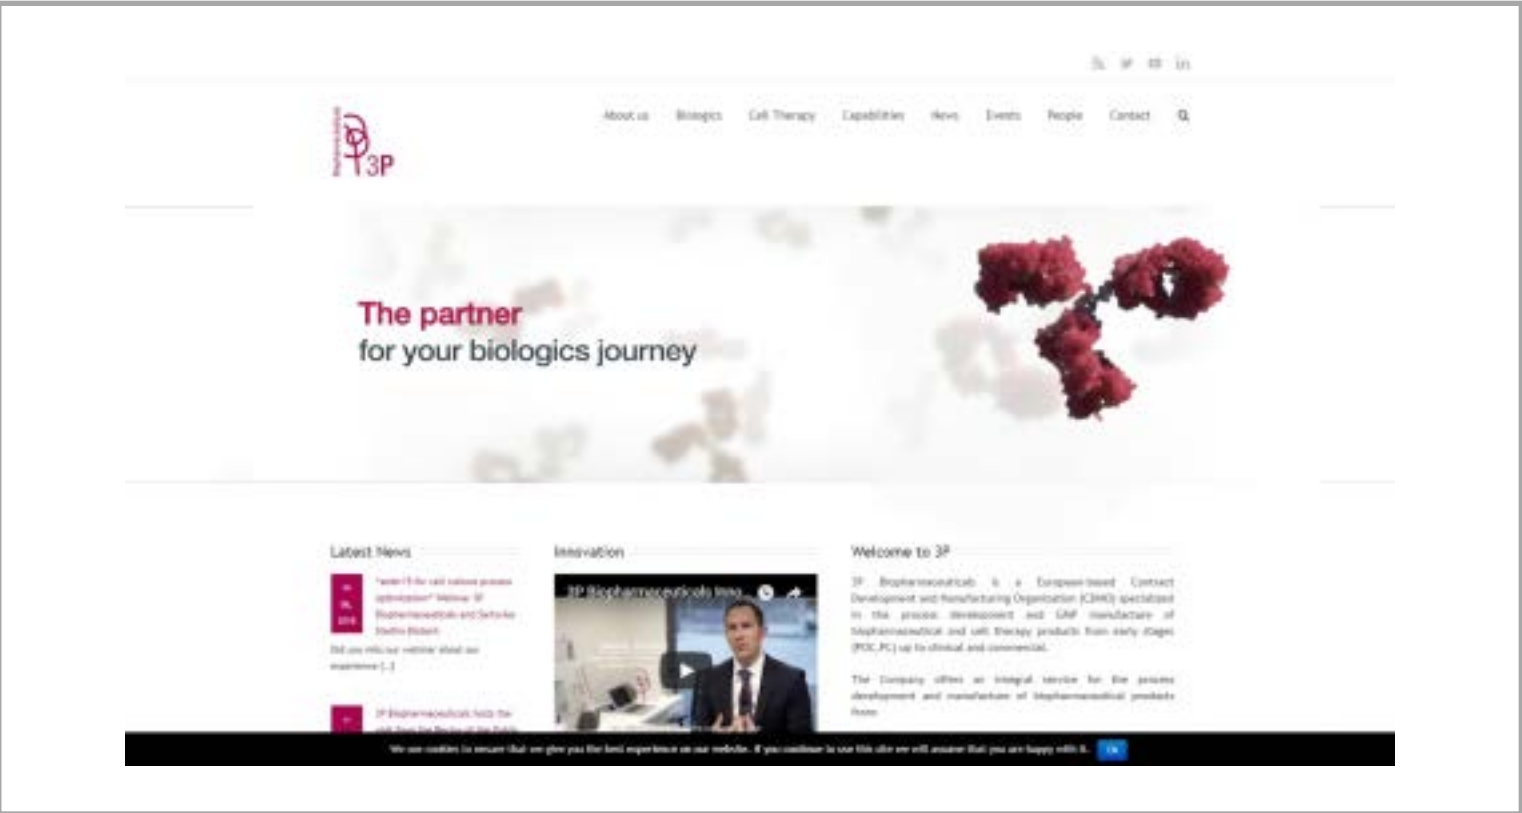

OUR INTERPRETATION

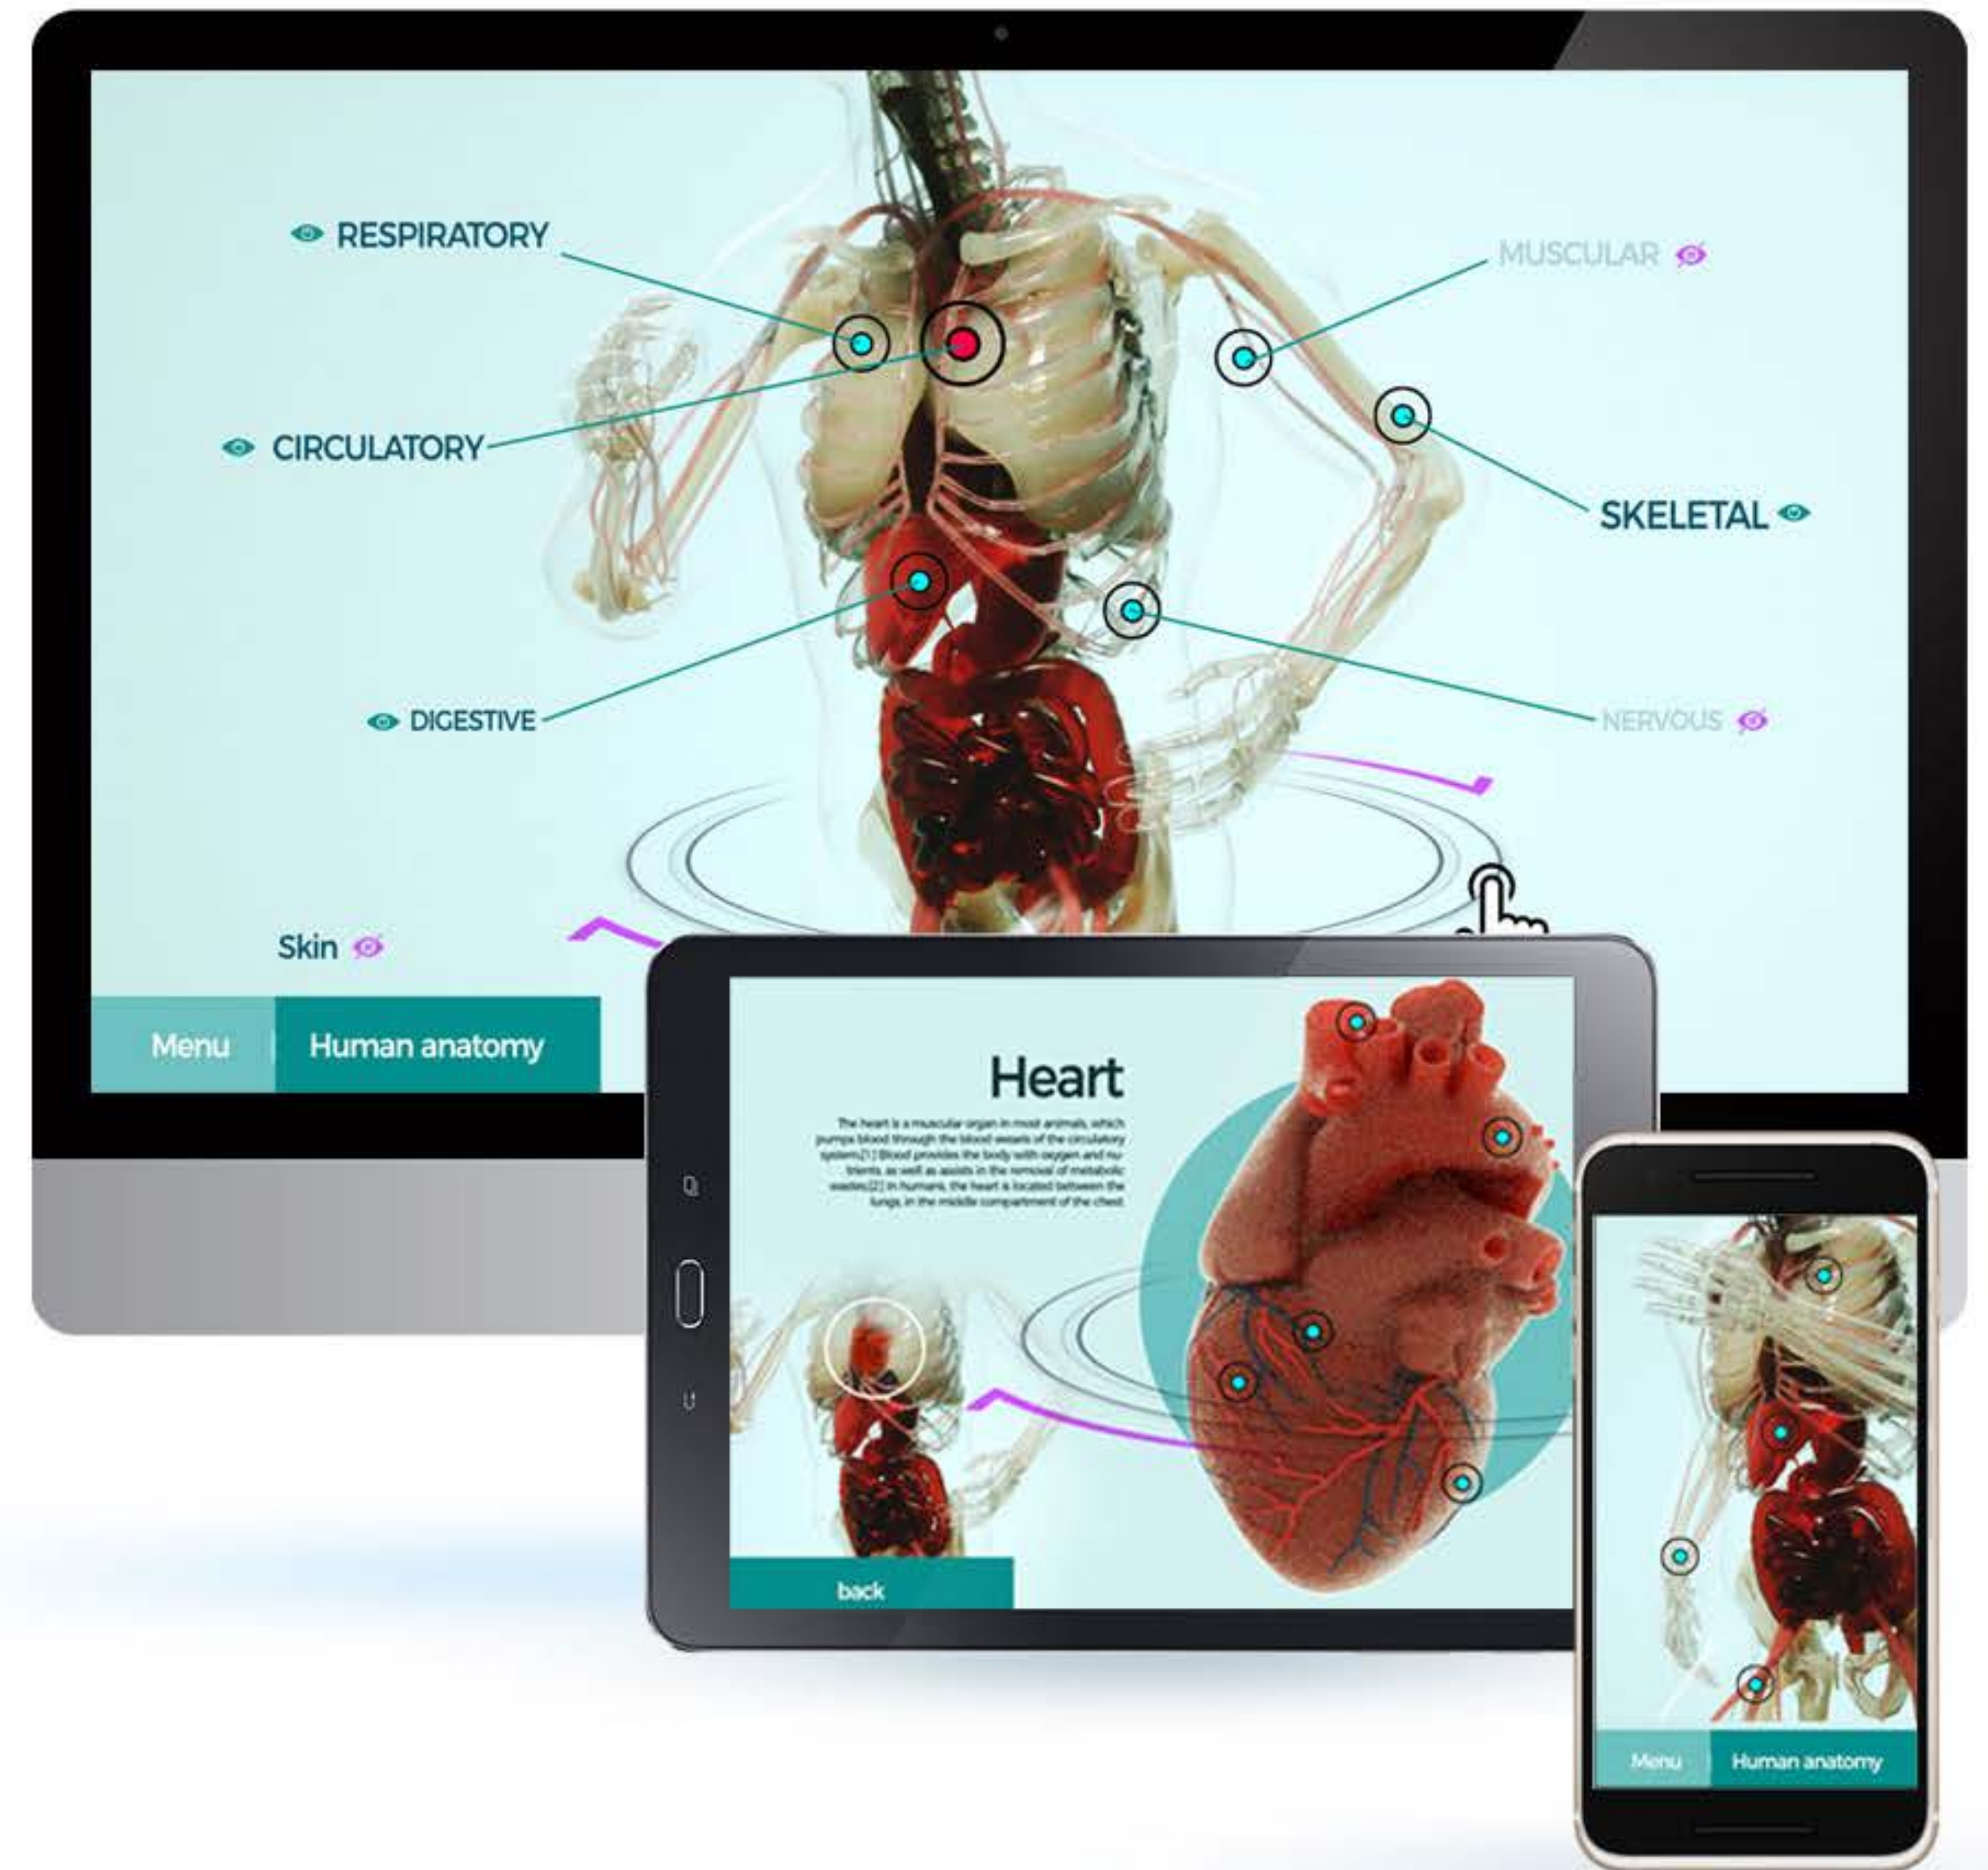

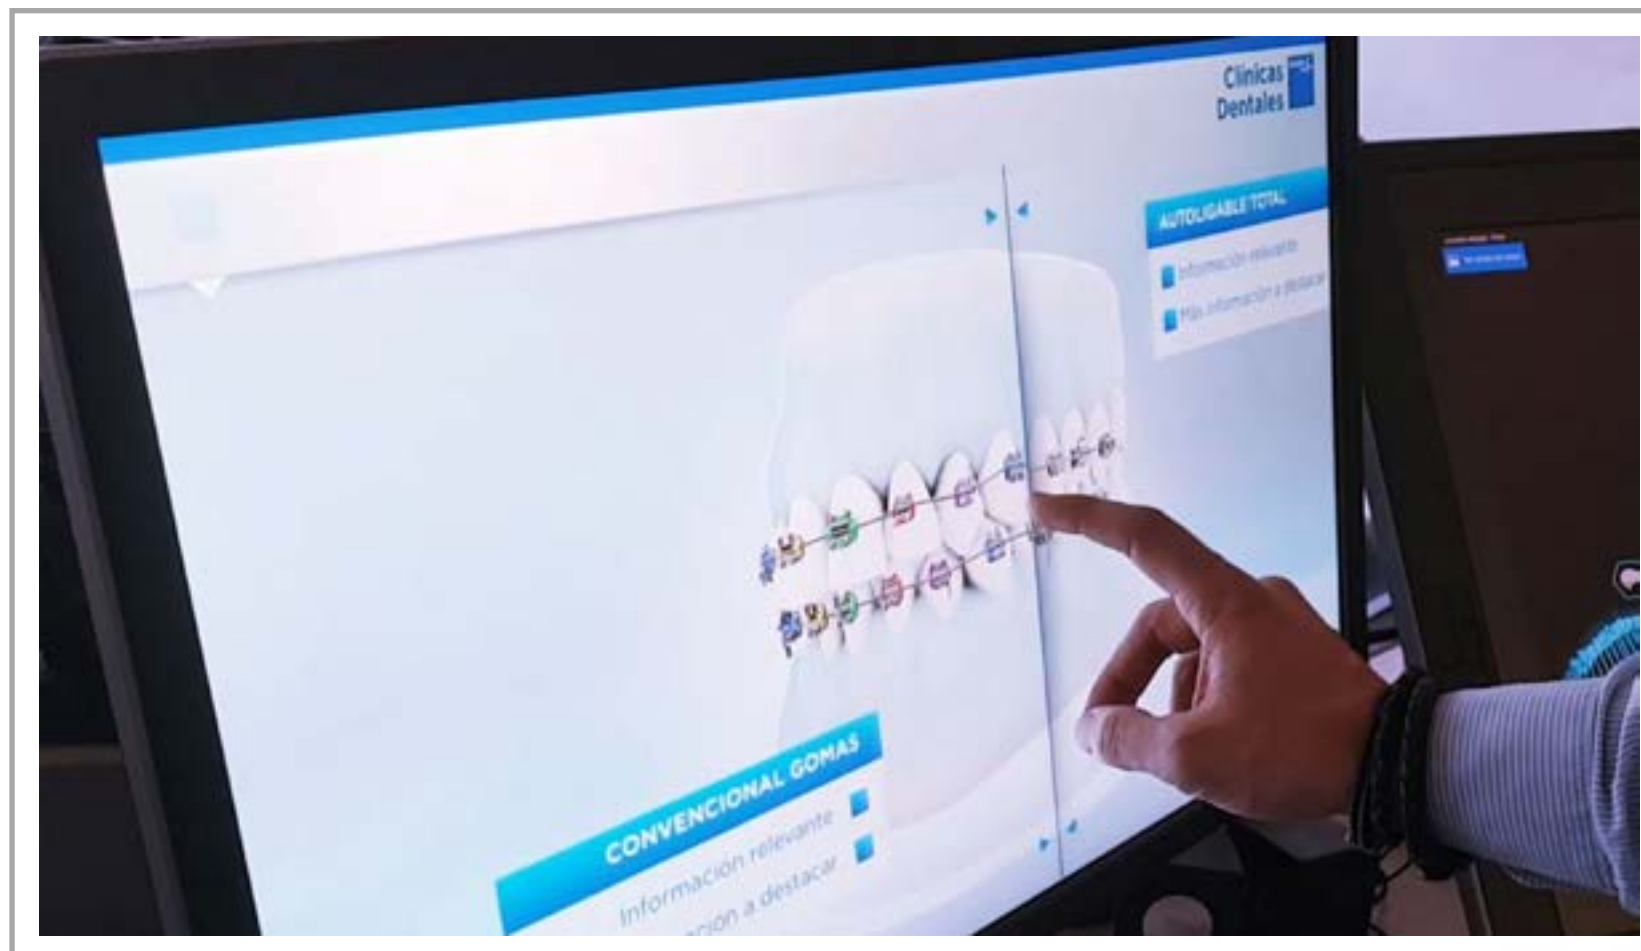

LOOPEDED ILLUSTRATIONS FOR WEB

Re-use all the developed graphics or create a new ones for producing a stunning scientific animation loop with creative styles that can be fully integrated and embeded in your own website to enhance the impact and style of it.

INTERACTIVE

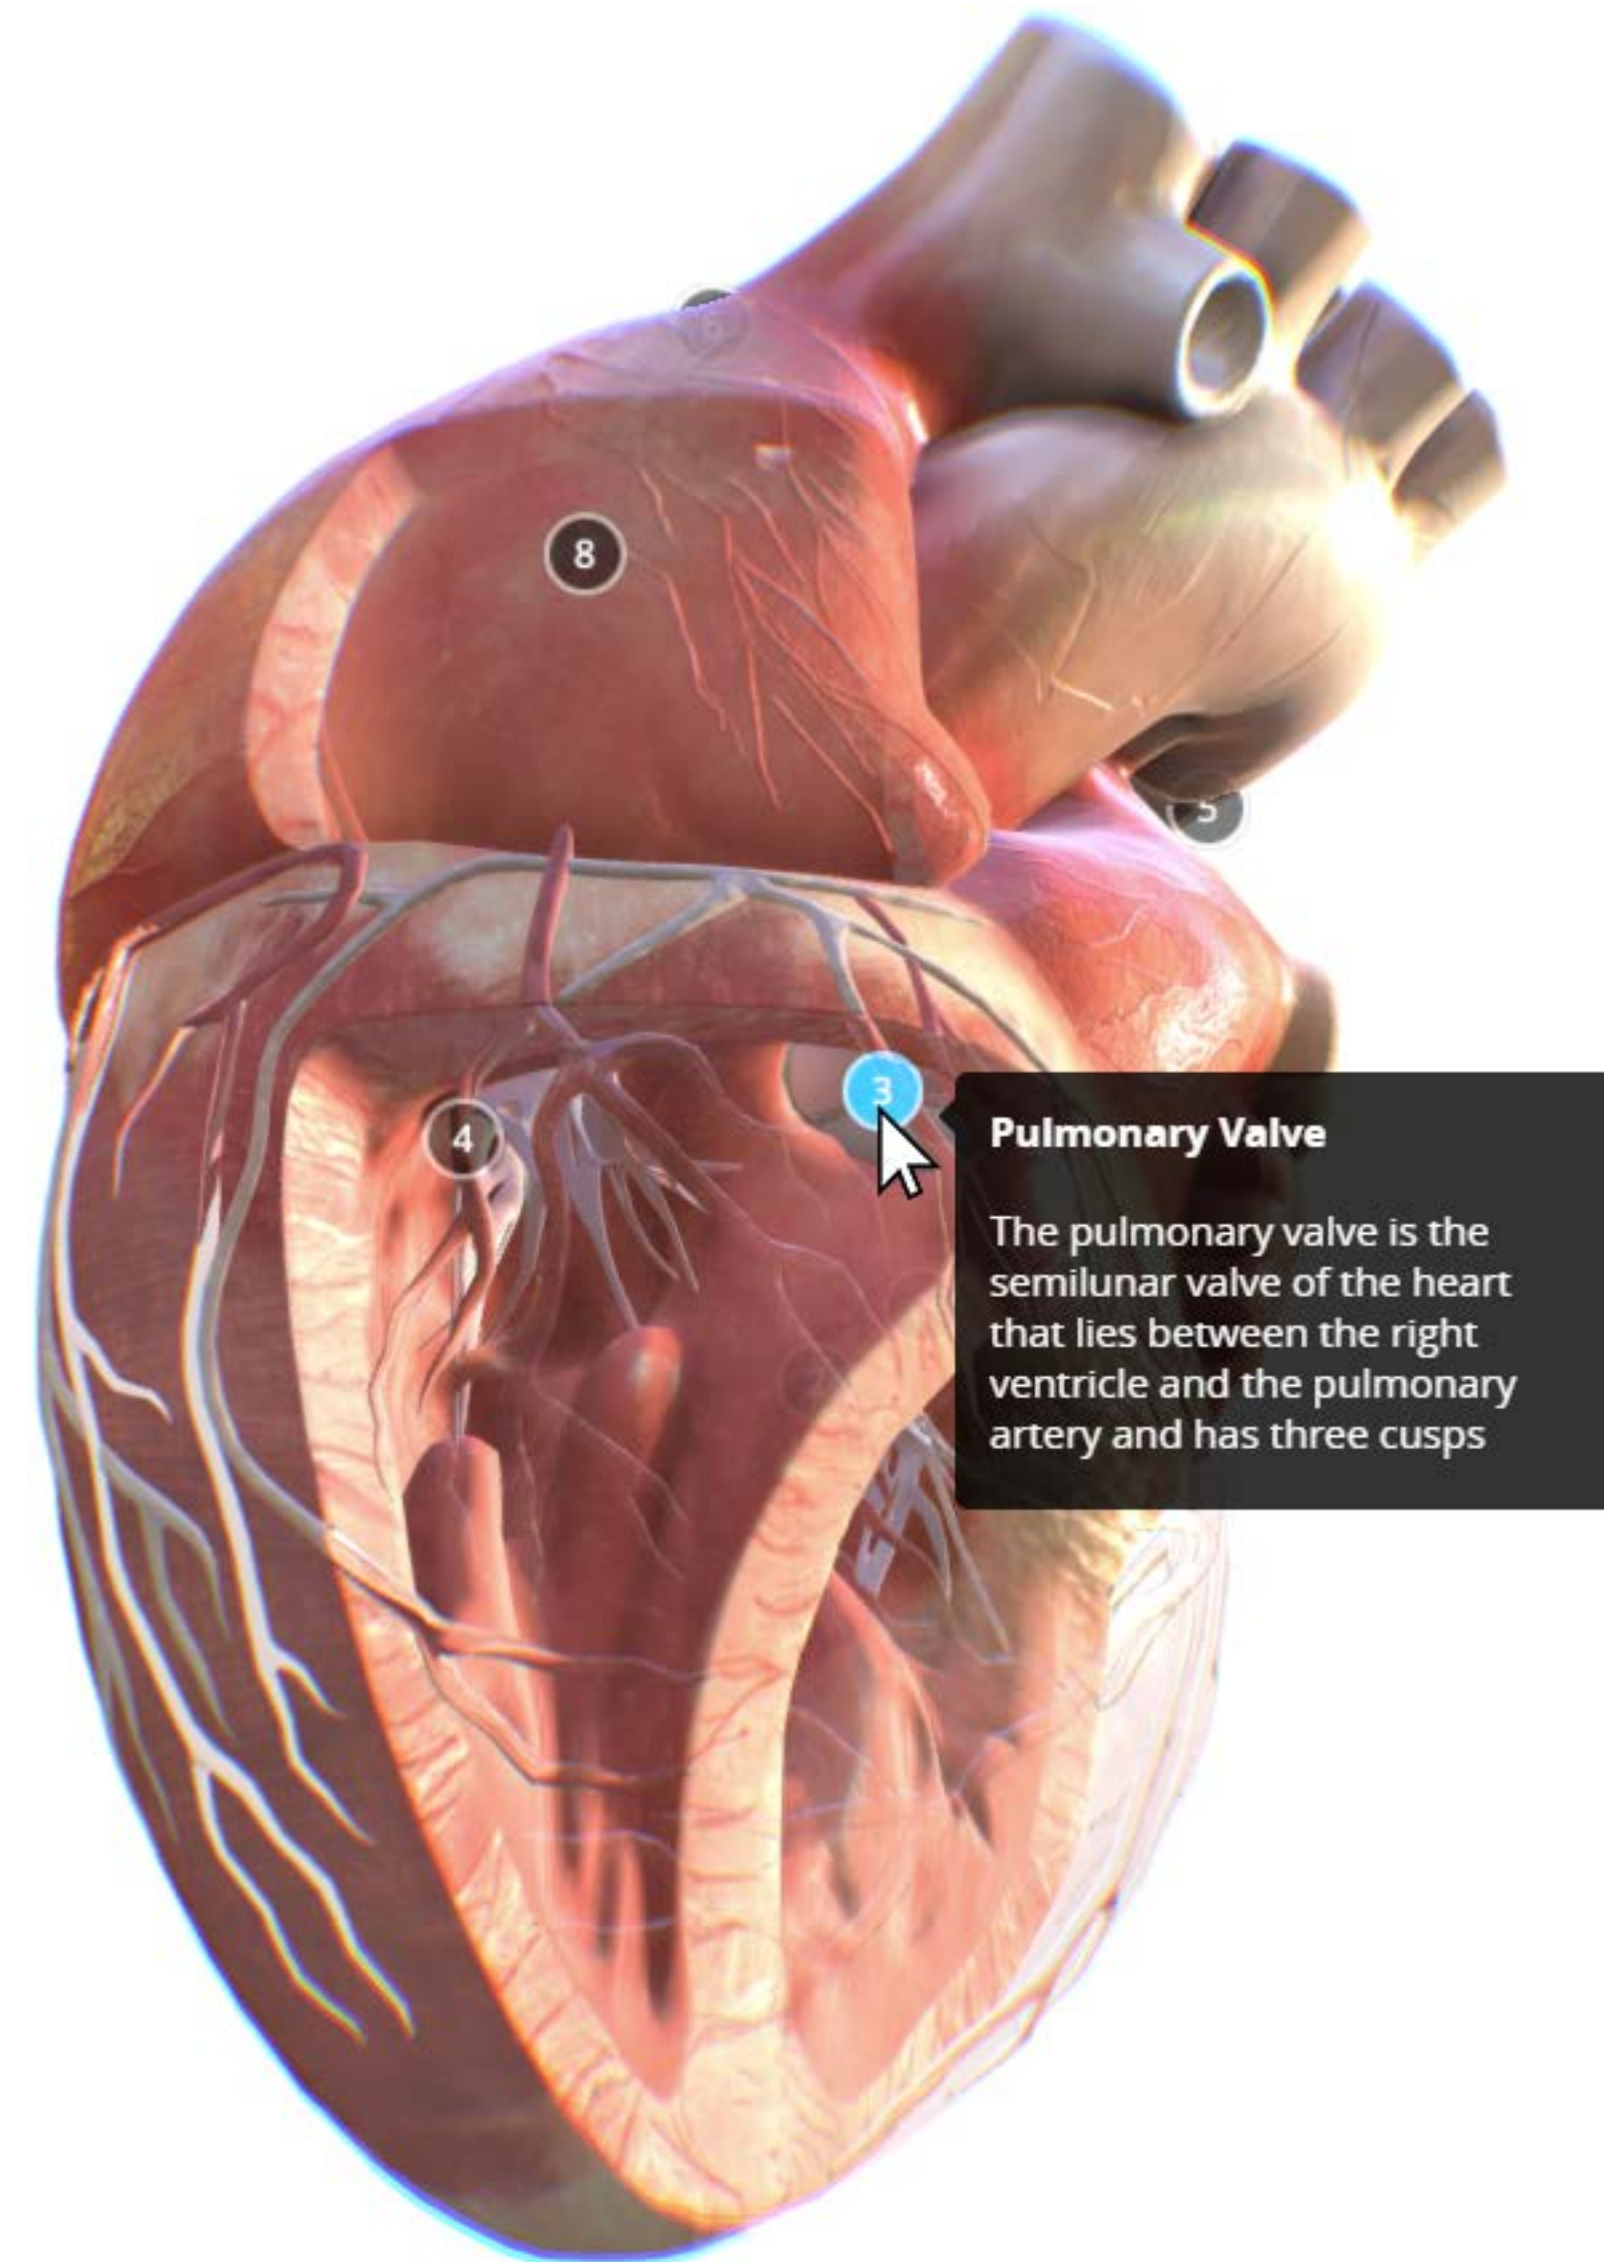

INTERACTIVE Websites, mobile applications, interactive video and eLearning media makes it easy to deliver remote training and marketing media to anyone anywhere.

3D INTERACTIVE MODELS

Create engaging visuals and interactive content for the product page and connect with your audience providing further information about the mechanism of action and features of your drug or technology by showing several perspectives, animation, tags and much more!

- Ideal to showcase new products at launch.
- Explain complex processes in an engaging way.
- Valuable for patient education and engagement.
- Stand out at events and increase brand awareness.
- Allows effective communication of key concepts.
- Valuable for sales teams and client engagement.
- Training medical and sales professionals.

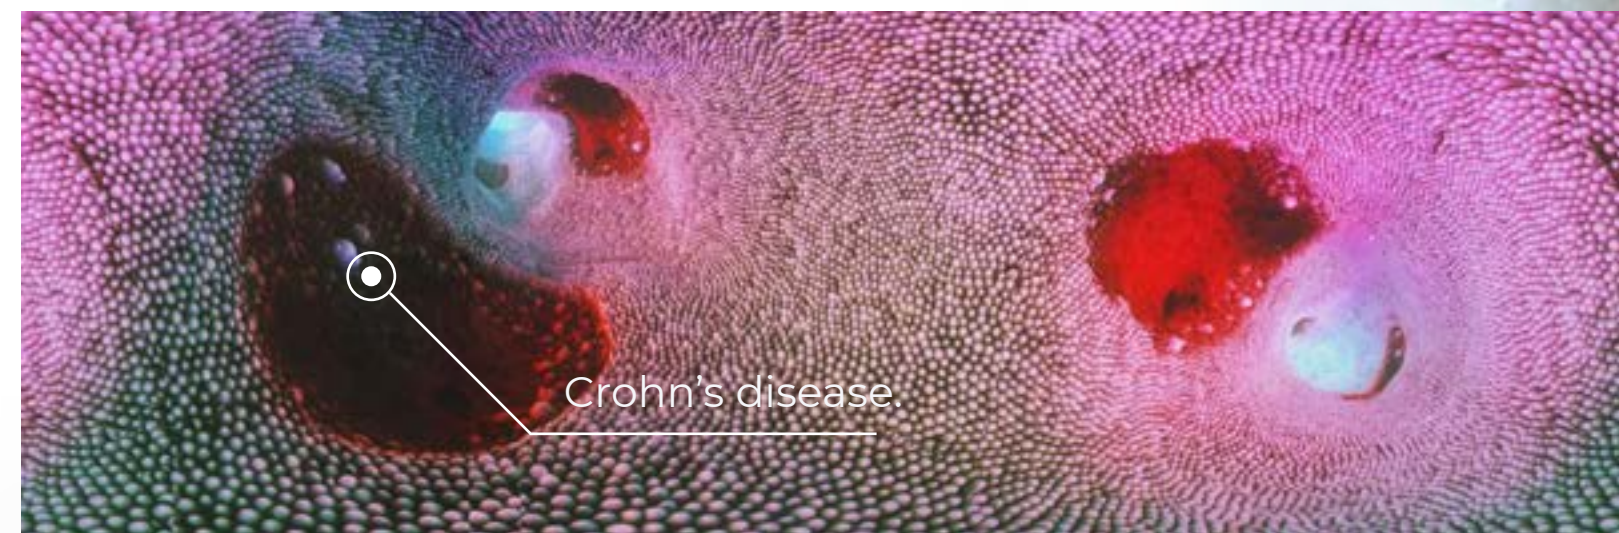

VIRTUAL REALITY (VR)

We create immersive graphics and replicate environments that simulates physical presence into an environment creating sensory experiences.
We'll work hand-in-hand with your team to create something unforgettable.
Engage your audience more deeply than ever!

PROJECTS:

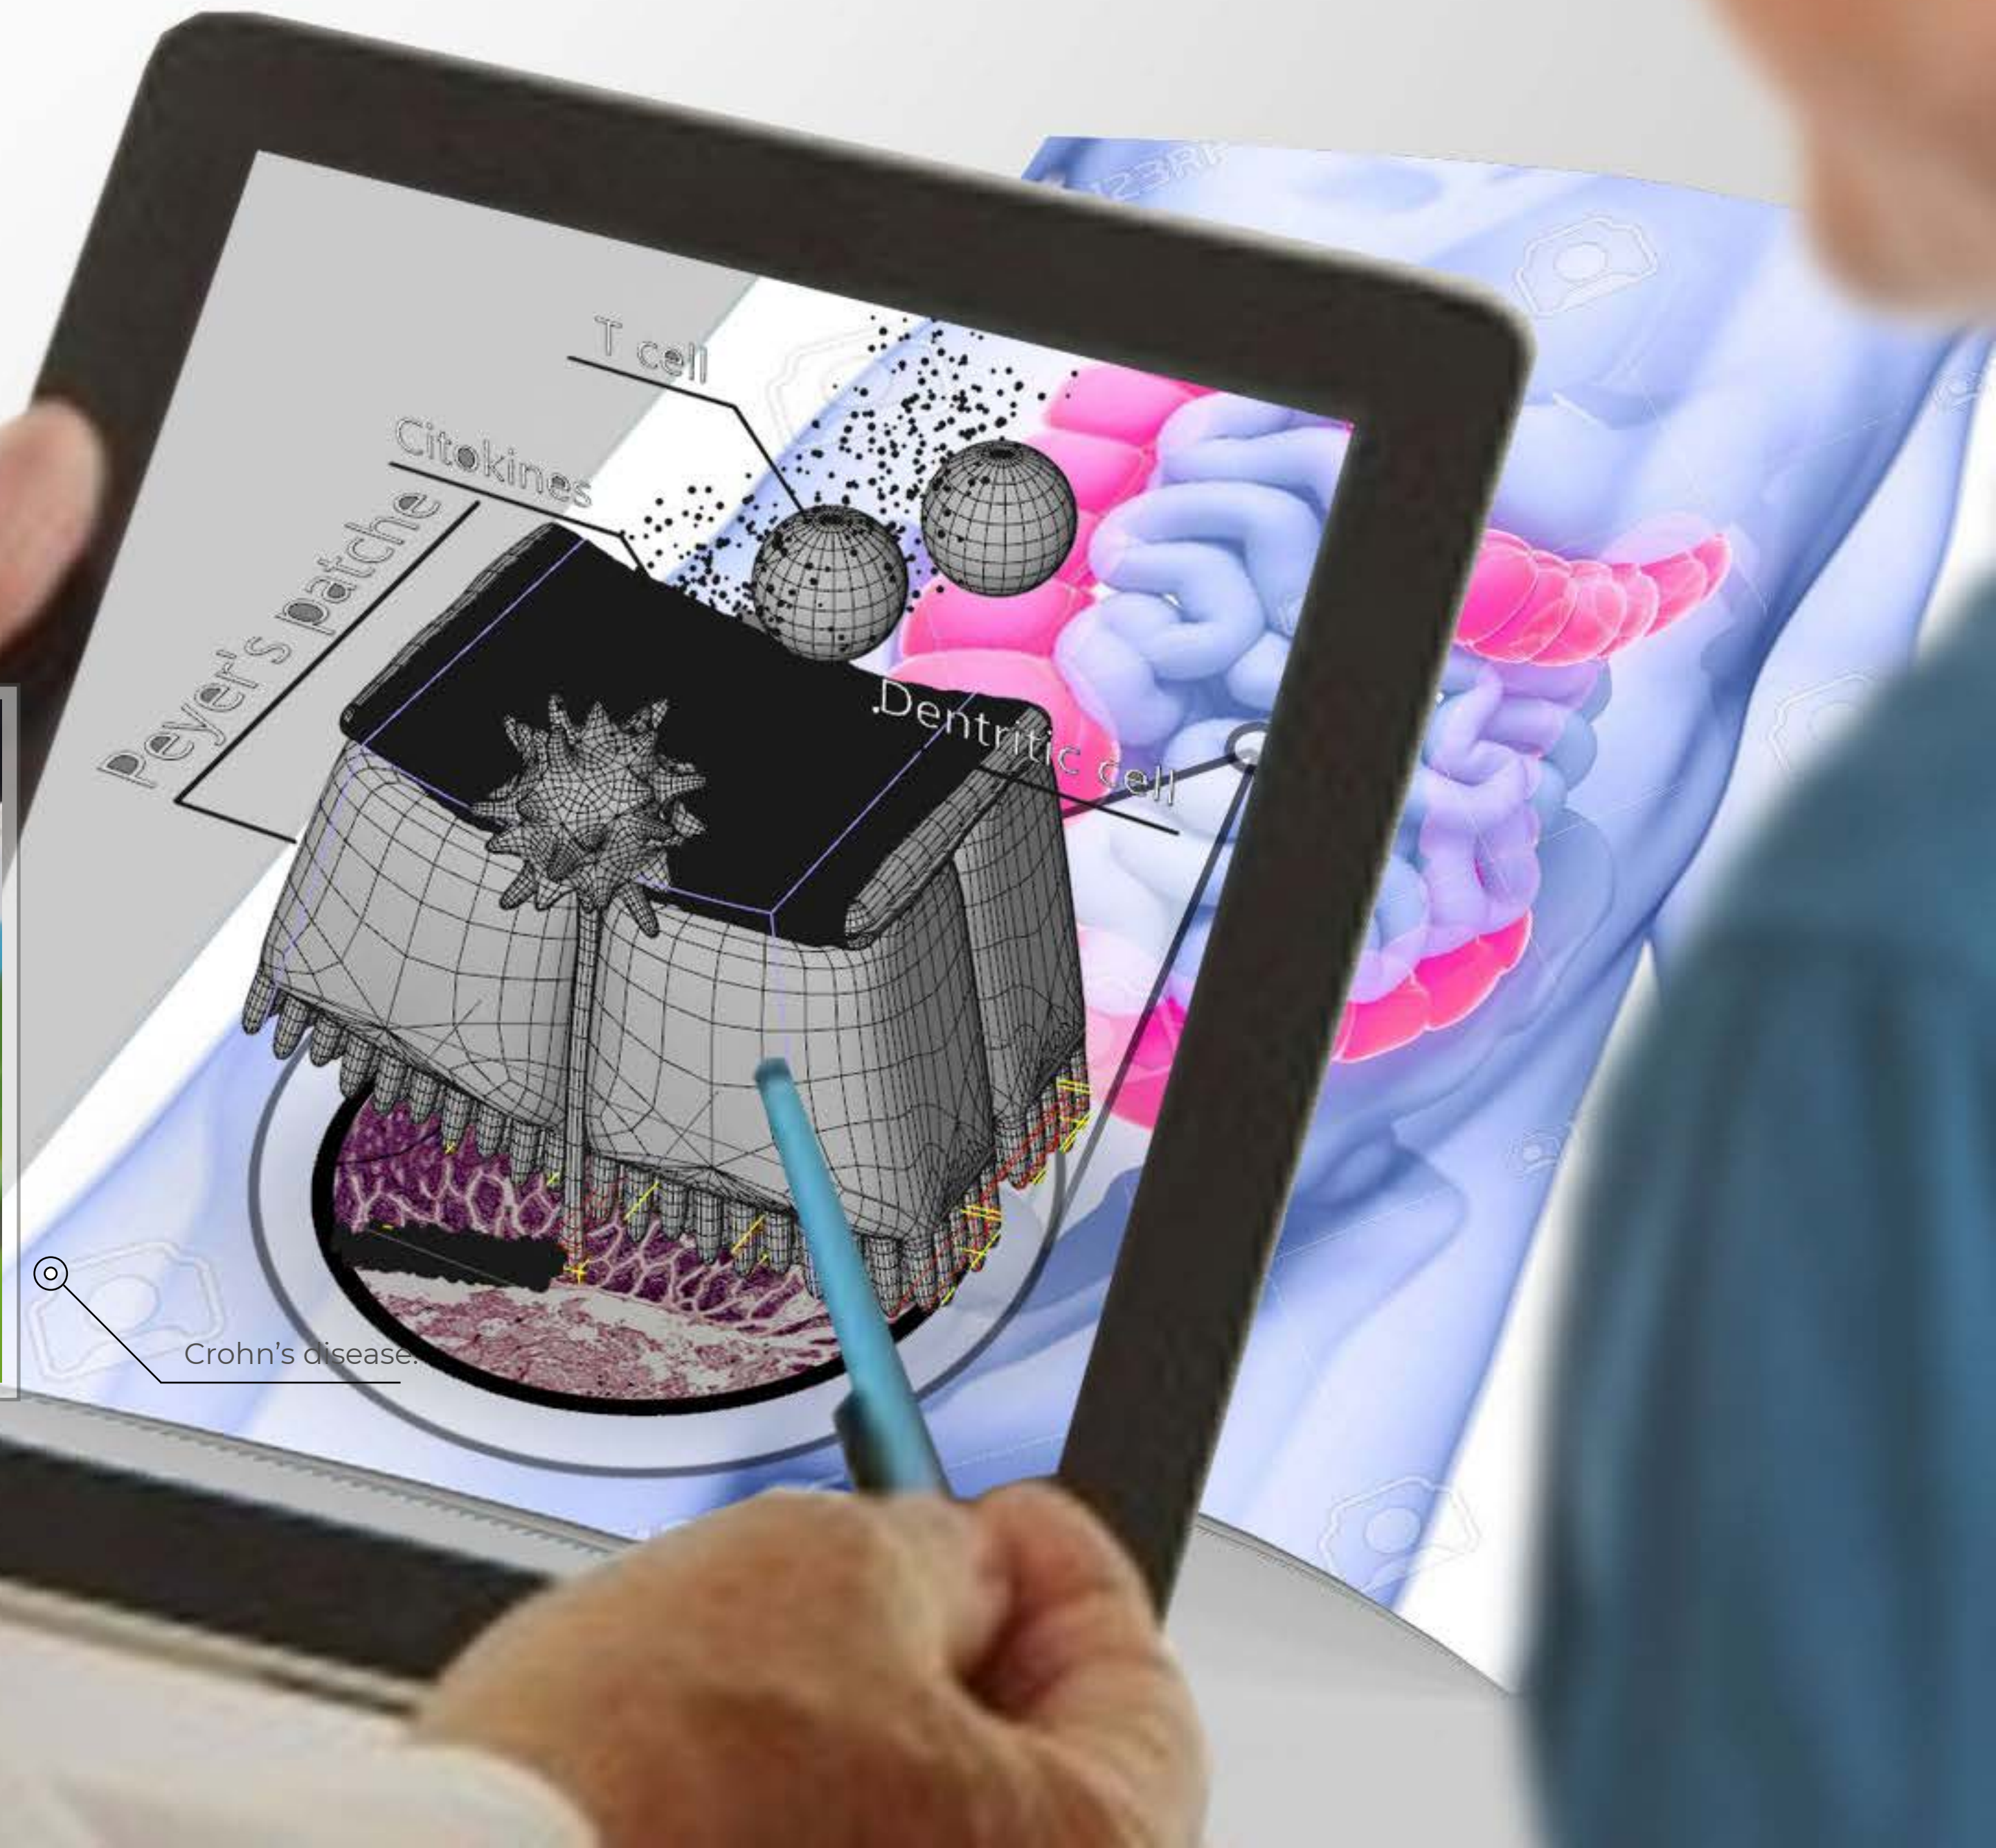

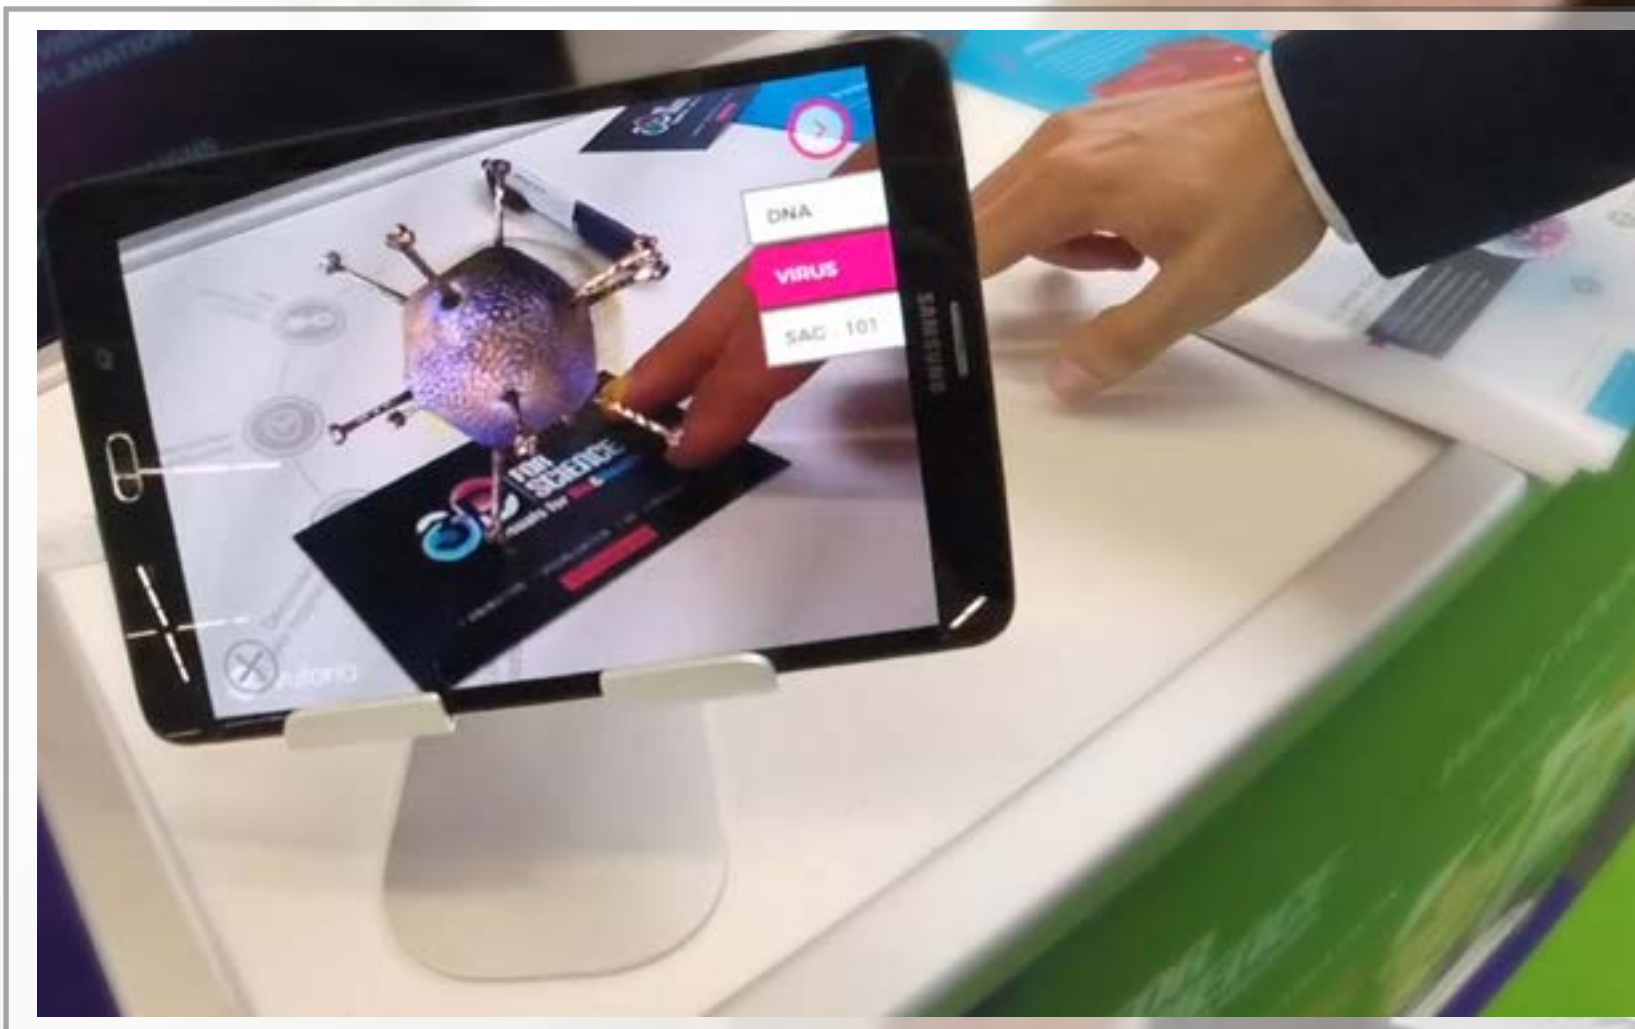

STELARA® (USTEKINUMAB)

Dive into the gastrointestinal tract and see how the monoclonal antibody is able to disrupt the resulting inflammatory cascade.

AR

From a physician and patient going over a disorder to a sales rep receiving some new details for a device, phones and tablets have a huge part to play in this industry. We design and produce mobile content that is beautiful, flexible, and stable.

HOLOGRAM INSTALLATION

There are a broad of possibilities:

from pure 3D animation to simulate an object (the most usual), graphic melements.

Animated 2D in motion graphics, real elements recorded on a black background and even parts of normal videos adapted to “float” within the box.

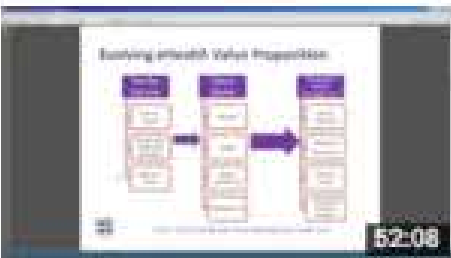

TOUCH SCREEN INSTALLATION

DISSEMINATION OF SCIENTIFIC AND MEDICAL KNOWLEDGE.

EMPLOYEE TRAINING

WORKFLOW

01

CONCEPT & DEVELOPMENT

— We listen, learn, and get to know your brand to decide how to tell your story in the most impactful way.

During the concept development stage, we listen carefully to what your goals and expectations are. In cooperation with you, we develop a plan for the video production.

02

QUOTATION

— Based on the necessary time, quality and equipment we create a quotation. We always can adapt ourselves to your company budget balancing quality, technology and delivery.

03

PRODUCING

— We will start sketching each scene using the storyboards and script as guidelines.

We will refine the textures and lighting to really bring your story to life. Several scenes are assembled together and if desired, sounds, music, animations, text and logos are added to the video.

After approval we render and compose everything to match the quality and style of the visualizations.

04

DELIVERING

— We deliver the file on our FTP server, ready to download. We can also help with publishing the video on Youtube or Facebook for example.

If desired, 3DforScience offers a professional Virtual Reality experience with our VR experts and professional VR headsets! In addition, it is also possible to be supplied with branded VR headsets. We can fully brand your corporate identity using branded cardboards.
